San Antonio Liebig's Meat Extract,

MANUFACTURED BY THE

SAN ANTONIO MEAT EXTRACT FACTORY,

SAN ANTONIO, TEXAS.

CHEAPEST AND BEST IN THE MARKET.

This Extract having been analyzed by our most eminent American and European chemists, is pronounced by them to be superior to any in the market.

It is a pure Extract of Beef, free from fat and gelatine, each pound of which contains the soluble, nutritive constituents of 34 to 36 pounds of the finest beef, exclusive of bones, corresponding to about 45 pounds of good butcher's meat.

It will keep unchanged for years in any climate, even if not tightly closed.

The Extract of Meat is of great service in the preparation of soups and a variety of dishes; it can be added to weak soups, vegetables, sauces, etc., to which it imparts all the nutritive properties of the best fresh beef; it is recommended to all households, as well as to restaurants and hotels. At sea and on the road it is an excellent substitute for fresh beef.

Its low price, small bulk and keeping properties have led to its adoption in the U. S. Army, in the Navy, in hospitals, and other public institutions.

For the sick, invalid, convalescent, also for persons or children of weak constitutions, nothing is more strengthening than the juice of fresh beef.

I would further say that the results of the analyses are in favor of the SAN ANTONIO MEAT EXTRACT FACTORY'S product in almost every particular.

Very respectfully yours, C. F. CHANDLER, PH. D.,
Professor of Analytical and Applied Chemistry.
SCHOOL OF MINES, COLUMBIA COLLEGE, NEW YORK.

The SAN ANTONIO MEAT EXTRACT answers perfectly all demands made on good Meat Extract in regard to taste and flavor.

WIESBADEN. DR. R. FRESENIUS.

I have examined the SAN ANTONIO MEAT EXTRACT, and regard it useful as a tonic and as an article of diet in Health and Sickness, when properly prepared.

41 E. 12th St., New York. WILLARD PARKER, M. D.,
Professor of Surgery, &c.

CAUTION.—None genuine without the signature of PROF. C. F. CHANDLER, of Columbia College.

R. DANNHEIM, General Agent,
100 Chambers Street, New York.

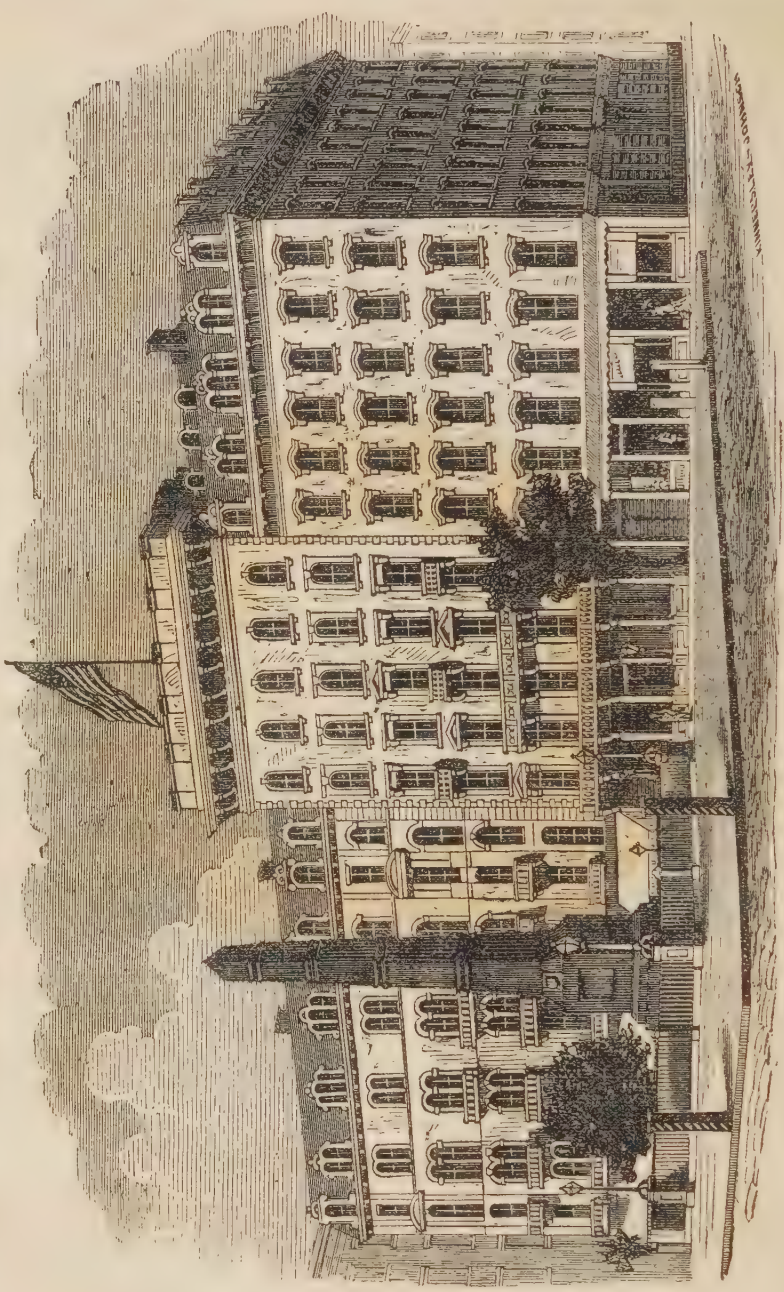
The Hoffman House, on Madison Square, a fine marble building, is one of the most elegant in the city. Its beautiful decorations and its management are in keeping with its wide reputation.

HOFFMAN HOUSE.



C. H. READ, Proprietor.

It is fully provided with all modern improvements, fire-extinguishers, watch-clocks, etc. The Restaurant is said by all travelers to be the best in the world.

THE HERALD ALMANAC FOR 1875.

THE ASTRONOMICAL CALCULATIONS HAVE BEEN MADE IN MEAN TIME, AND EXPRESSLY FOR THIS ALMANAC, BY SAMUEL H. WRIGHT, A. M., PH. D., PENN YAN, YATES COUNTY, N. Y.

Eclipses.

There will be two Eclipses this year:

I. A Total Eclipse of the Sun, April 6. Invisible in the United States.

II. An Annular Eclipse of the Sun, September 29. Visible east of the Mississppi river as a partial Eclipse, the Sun rising Eclipsed. Also in Africa and Southwestern Europe, The eclipse will be annular or ring-like from Sodus Point on the south shore of Lake Ontario, Lyons, Oswego, Syracuse, Utica, Saratoga, and Northern Massachusetts to the ocean. Along the central line the size of the Eclipse will be 11¼ digits.

For the time of ending and size, see the following table:

A Table of Sixty-one Bright Stars.

To ascertain when any Star found in the following Table will be on the *upper* meridian, *add* the numbers opposite in the left-hand column of figures to the time of "*Sidereal* Noon," found in the calendar pages. For the rising of a star, *subtract* the number opposite in the right-hand column of figures from its meridian passage. For the setting of a star, *add* the same number to its meridian passage. Those marked (....) revolve in a circle of perpetual apparition, and do not rise nor set north of the latitude of New York (40° 42′ 40″), for which latitude the semi-diurnal arcs are calculated. The civil day begins at midnight, and consequently 24 hours after midnight, or 12 hours from noon, is *morning* of the succeeding day; and more than 24 hours from noon, is *evening* of the next day. This table is arranged in the order of culmination.

Surveyors and Civil Engineers may obtain the declination of the magnetic needle by observations on the Pole Star when upon the meridian, or when at its greatest elongation east or west. Polaris and other stars pass the *lower* meridian 11h. 58m. after their upper transit. To the time of upper transit of Polaris, add 5h. 54m., and it gives the time of greatest *western* elongation. If the 5h. 54m. be subtracted from the time of upper transit, it will give the time of greatest *eastern* elongation. Observations made at the time of greatest elongation are *less* liable to error than those made at the time of transit. The mean distance of Polaris from the pole this year is 1° 21′ 16.67″. To find its azimuth for any latitude, take from 18.3736578 the logarithmic cosine of the latitude, and the remainder is the logarithmic sine of the azimuth.

JENKINSON'S HOTEL,

HIGHLANDS OF NEVARSINK, N. J.

The situation of this hotel, on a plateau of the Highlands, commanding one of the most extensive and beautiful views of the Atlantic Ocean and waters of the Harbor and Bay of New York, renders it the most attractive and desirable of all the summer resorts near the city. Its advantages cannot be surpassed, if at all equaled, in surf and still bathing, boating, fishing, and above all in its contiguity to the city.

Livery stables and stalls for private horses attached to the hotel.

Take New Jersey Southern Railroad or steamboat Sea Bird. Five trains per day each way.

JAMES JENKINSON,

Proprietor.

THE NEW AND COMFORTABLE REMEDY FOR RUPTURE

Is now adopted by all well-informed persons.

It is worn night and day without any discomfort; yields to every motion or position of the body; can never become displaced by the hardest exercise or severest strain, and soon effects a perfect and permanent cure. No person in the whole country will now wear any of the wretched metal springs, iron hoops, finger-pads, wire-springs, etc., after he has once seen the new Elastic Truss. A few unprincipled dealers, unable to sell spring trusses, now steal the name "Elastic Truss" and sell worthless "Rupture Belts," bogus elastic and "Band" trusses to ignorant persons. It is well to avoid all such impostors. The Elastic Truss Co., incorporated in 1867, send their admirable appliance by mail, at a low price, to all parts of the country. Circulars sent on request. Principal office, No. 683 Broadway, New York City. Branch Offices, No. 129 Tremont St., Boston; No. 44 West Fourth St., Cincinnati; No. 1202 Chestnut St., Philadelphia; No. 235 Pennsylvania Avenue, Washington, D. C.; No. 415 East Water St., Milwaukee; and twenty-three other principal cities of the Union.

THE AMERICAN YACHT LIST,

Published Annually in May, under the Official Sanction of the New York and Eastern Yacht Clubs.

It contains a complete register of the Yacht Clubs of the United States and Dominion of Canada, with a list of their officers, names and owners of vessels, modelers, builders, and sailmakers.

Also a correct list of Races for each year, with particulars of same; names of Pilot-Boats in commission for the Port of New York; addresses of American and Foreign Yacht Club secretaries.

Also fac-similes in colors of Club Flags, and, by special permission, the New York Yacht Club's private code of signals.

The List will be forwarded by the Publisher, post-paid, on receipt of $1.00.

Address: "AMERICAN YACHT LIST,"

No. 20 EAST 27th STREET, NEW YORK.

A Table

OF THE NUMBER OF DAYS FROM ANY DAY IN ONE YEAR TO THE SAME IN ANY OTHER.

	Jan.	Feb.	March.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.
January	365	31	59	90	120	151	181	212	243	273	304	334
February	334	365	28	59	89	120	150	181	212	242	273	303
March	306	337	365	31	61	92	122	153	184	214	245	275
April	275	306	334	365	30	61	91	122	153	183	214	244
May	245	276	304	335	365	31	61	92	123	153	184	214
June	214	245	273	304	334	365	30	61	92	122	153	183
July	184	215	243	274	304	335	365	31	62	92	123	153
August	153	184	212	243	273	304	334	365	31	61	92	122
September	122	153	181	212	242	273	303	334	365	30	61	91
October	92	123	151	182	212	243	273	304	335	365	31	61
November	61	92	120	151	181	212	242	273	304	334	365	30
December	31	62	90	121	151	182	212	243	274	304	335	365

EXAMPLE.—To find the number of days from the 10th of May to the 10th of October following. Find May in the first column, and then in a line with that under October, is 153 days. If from the 10th of May to the 25th of October it would be 15 days more, or 168 days; but if from the 10th of May to the 1st of October, it would be 10 days less, or 143 days. In leap-year, when the last day of February is included between the two dates, there will be one day more than by the table.

Oriental Calendars.

CHINA.—The Chinese civil year is lunar, and consists of 12 months of 29 and 30 days alternately. In every three years a thirteenth month is added to accommodate the variations of the solar and lunar years. But this is not entirely effected by such an arrangement, consequently the Chinese have a cycle of 60 years, in which period 22 intercalary months occur. The superstitions of that nation render the almanac of the utmost importance, as it contains a statement of "lucky and unlucky days," in a manner somewhat resembling the impudent impostures of the same kind sold in our own country. The year is divided into 24 periods, corresponding to the position of the sun, at its entrance into and at the middle of each sign of the Zodiac.

JAPAN.—As in China, the almanac is one of the most important works published in Japan. The year is divided into 12 months, corresponding to the twelve signs of the Zodiac. The months, however, vary in length, and the Mikado, or Religious Emperor, assigns the necessary intercalary days, and the months that have to be added to accommodate the variation of the solar and lunar years. The division of daily time is effected in a curious manner, a peculiar sacredness attaching to the number *nine*.

HINDU.—In this calendar the luni-solar year is employed for the regulation of festivals and domestic arrangements. The year commences at the instant of the conjunction of the sun and moon in the sidereal month *Chaitra*. The month consists of 30 *Tithis* or lunar days, and is divided into two equal parts of 15 Tithis each, corresponding with the increase and decrease of the moon in regard to its brightness; but in different parts of India variations of this method occur, to make up deficiencies, etc., that arise in the annual, or successive annual calendar in regard to intercalary days.

Treasury Department—Officials.

NEW YORK.

THE "AMERICAN DOCKS,"

Tompkinsville (Port of New York), Staten Island.

These Storage Docks and Warehouses are unsurpassed for the storage and safe-keeping of merchandise, such as Cotton, Sugar, Coffee, Salt, Iron, and South American and East India Goods. Being located where vessels of any size, either steam or sail, can enter and depart at all seasons, at either high or low tide.

These Docks are particularly adapted to the handling of Cotton, large covered piers and ample bulkheads and yards, furnishing facilities unequaled for weighing and delivery in all weather. Our facilities for extinguishing fires gives to our patrons low rates of insurance. The whole premises are isolated from the public streets and securely inclosed and under thorough police regulations, thus affording protection night and day against thieves or fire. To save expense of lighterage to our Docks, Cotton should be consigned by Bills Lading, care "The American Docks." For storage, apply to New York office, 110 Pearl Street.

J. A. BOSTWICK, Proprietor. **B. P. BAKER & CO., Managers.**

FINANCIAL DAILY RECORD.

ESTABLISHED 1871.

The Only Daily Financial Newspaper in the World.

The Record has met with greater favor than its projectors had any reason to expect when, more than three years ago, they inaugurated the novel experiment of printing a daily journal devoted to finance alone. It has filled a field hitherto unoccupied and its usefulness has been recognized in the fact that its files can be consulted in many of the prominent banking houses in this country, as well as England and the Continent. Its quarto form, cut and stitched, affords a convenient reference to its comprehensive tables of statistics, as well as to the daily transactions at the Stock Exchange, and thus it is almost indispensable to every banker and merchant.

The copious extracts from the financial columns of the Daily Morning Press—*printed simultaneously with their issue*—are a distinguishing feature of the RECORD, thus enabling the reader at a glance to compare the views of the leading financial writers, without resort to the original issue. The paper is published every morning at four o'clock, in time for the early morning mail, by the ***MANHATTAN PRINTING COMPANY, 42 Broad Street, N. Y.***

☞ TERMS.—$10 per annum, in advance. $6 six months, in advance.

Daily Quotations of Cotton in the New York Market for 1874.

Nebraska.

Capital, Lincoln—Population, 122,993.

The election in this State, held on the 13th October, resulted in a Republican success in the person of Silas Garber as Governor and the other State officers on the ticket. Also in the election of a Republican majority in the Legislature and the re-election of Lorenzo Crounse to Congress. The official return of the vote of the State for Governor will only be announced after the same has been laid before the Legislature, and that body has officially announced the result. Full returns will be given in our second edition.

Ontario, 3d Mon. of March, Smith.
Wayne, 4th Mon. of June, Smith.
Livingston, 3d Mon. of June, Smith.
Yates, 4th Mon. of Jan., Rumsey.
Seneca, 1st Mon. of April (1874, Waterloo; 1875, Ovid), Dwight.

Special Terms for Motions, to be held at Rochester on the last Monday of each month:

Jan., Smith; Feb., Rumsey; March, Dwight; April, Smith; May, Dwight; June, Rumsey; July, Smith; August, Dwight; Sept., Rumsey; Oct., Smith; Nov., Dwight; Dec., Rumsey.

EIGHTH JUDICIAL DISTRICT.

Special Terms.

Erie Co.—3d Tues. of Jan., Barker; 4th Tues. of March, Lamont; 3d Tues. of June, Barker; last Tues. of Aug., Lamont; 2d Tues. of Nov., Daniels.

Should the last-named day prove to be the day of the general election, the court will be opened on the following day.

Cir. Courts and Cts. of Oyer and Ter.

Erie Co.—1st Mon. of Feb., Barker; 1st Mon. of April, Daniels; 4th Mon. of Sept., Lamont; 4th Mon. of Nov., Barker.

Allegany Co.—3d Mon. of Feb., Daniels; 3d Mon. of June, Lamont; 3d Mon. of Oct., Barker.

Cattaraugus Co.—1st Mon. of Feb., Lamont; 4th Mon. of May, Barker; 4th Mon. of Sept., Daniels; Last Tues. of Oct. (Special Term), Lamont.

Chautauqua Co.—1st Mon. of Jan., Daniels; 2d Mon. of May, Lamont; 1st Mon. of Sept., Barker; last Tues. of Oct. (Special Term), Daniels.

Orleans Co.—1st Mon. of Jan., Lamont; 3d Mon. of May, Daniels; 1st Mon. of Oct., Barker.

Should the first Monday of January be the first day of the month, the courts designated for that day will convene on the following Tuesday morning.

Genesee Co.—3d Mon. of March, Barker; 3d Mon. of June, Daniels; 4th Mon. of Nov., Lamont.

Niagara Co.—4th Mon. of Jan., Daniels; 3d Mon. of April, Barker; 1st Mon. of Sept., Lamont; 4th Tues. of Nov. (Special Term), Daniels.

Wyoming Co.—1st Mon. of May, Daniels; last Mon. of Aug., Barker; 2d Mon. of Dec., Lamont.

THE NEW YORK HERALD.

A Map of Busy Life—Its Fluctuations and Its Vast Concerns.

OPINIONS OF THE PRESS.

Extraordinary Success of the Herald.

From an ably written article in the *American Grocer*, graphically describing an after-midnight visit to the HERALD office, we extract the following tribute to what it recognizes as business enterprise, especially notable as coming from a paper solely devoted to business:

Such an inspection of the HERALD office as we have described develops the secret of the extraordinary success of the paper. The policy of Mr. Bennett is to make it the best newspaper in the world, totally regardless of expense. A glance at the enormous sums expended for the accomplishment of this capital design will stagger the timid, confound the nervous, and astonish the uninitiated. The Paris bureau of the HERALD is an admirable piece of energetic administration, wise adaptation, alert energy, and judicious outlay, involving expenditures which would beggar an ordinary fortune and tax the resources even of a Rothschild. Situated at the seething centre of European politics, and at the headquarters of literature, art, and fashion on the Continent, with an able band of subalterns, the Paris correspondent of the HERALD is one of the most important representatives of the American press, and must of necessity be a man of eminent abilities, great fertility of expedients, and untiring energy. HERALD correspondents are found in every important city throughout the whole world, and are encouraged to employ every legitimate means, not only of collecting but also of transmitting intelligence with the utmost celerity. The amounts paid for the support of this widely ramified system of correspondence differ greatly in individual cases, but the aggregate is larger than any other paper could afford to pay. The shipping news of the HERALD is one of the most costly departments of the journal, for Mr. Bennett takes a laudable pride in presenting to the public a feature at once the most costly and unique in the annals of the press. Hourly from all points of the globe to which the iron nerves of the telegraph wires radiate come flashing to the HERALD office the news of the arrival, departure, condition, and cargo of every ship that touches the ports of the world. The numberless heads and hands that conspire to concentrate at one point all this multifarious intelligence; the amount of vigilance and activity required to note the vast array of details; the incalculable interest that centres about this wonderful record—all impress the mind with profound surprise and admiration. * * * Additional instances of the lavish expenditures of Mr. Bennett are afforded by the fact that the HERALD keeps afloat at great cost two splendid, swift-sailing steam yachts, for the express purpose of intercepting vessels coming in from sea, and of securing the latest news in advance of all competition; while, during the summer season, the journal has engaged a special Sunday train at its own expense to carry the paper to Saratoga and Lake George and intervening points. * * * The world is familiar with the extraordinary generosity which prompted the Livingstone rescue expedition under the indefatigable Stanley. Nor can the public forget with what lavish hand Mr. Bennett spent thousands upon the Abyssinian campaign, the Franco-Prussian war, the military occupation of Khiva, and the late warlike demonstrations against the Ashantees. Yet the wisdom of such seeming recklessness is vindicated by the splendid and growing success of the HERALD, and we get a glimpse of the financial resources of the enterprise when we learn that not unfrequently one of its quintuple issues comprises sometimes as many as eighty columns of solid advertising matter.

A Green Mountain Compliment.

[*From the Woodstock* (Vt.) *Spirit of the Age.*]

The NEW YORK HERALD has long held the position as the head of the American press. And today it is stronger and more enterprising than ever. That it is well appreciated by the reading public is evidenced by the fact that its daily circulation is over 100,000 copies, while the circulation of its weekly edition is also immense. The HERALD spares no expense in the procurement of the latest news, not only from every section of this Continent, but throughout the world. It has able correspondents in every capital in Europe, while, daily, its columns breathe with telegraphic dispatches from almost every portion of the civilized world. If any one wants a New York daily paper, and every business man almost does, let him send for the NEW YORK MORNING HERALD; for one wanting a weekly New York paper, we recommend the WEEKLY HERALD.

The Herald and the Creedmoor Rifle Match.

[*From the Hartford Times.*]

The New York (Sunday) HERALD had a full page illustrative account of the rifle match between the Irish and American "teams," at Creedmoor, Long Island, on Saturday—showing first a map of the grounds, with the different ranges, second a description of the targets, and last the targets in full, showing the exact firing of each member of both teams at the respective ranges—800, 900, and 1,000 yards. The HERALD beats all its contemporaries in such things. The Irish team had won in England the Elcho Shield at Wimbledon, and they have stood, and still stand, very high in the public estimation as accurate marksmen. Few persons expected that the American team would win, and the fact that they did is a most honorable triumph for them.

Herald Enterprise.

[*From the Galveston Civilian.*]

One of the most remarkable instances of private enterprise known to the present age is that which characterizes the NEW YORK HERALD in the running of a Sunday express from New York to Saratoga and Whitehall for the sole purpose of selling and delivering the Sunday morning issue of the HERALD along the line of the railroad, extending as far as Whitehall, Lake George. At three o'clock Sunday morning the mail train leaves the depot in New York, carrying only the NEW YORK HERALD, and, with almost lightning speed, it dashes on, stopping but a moment at the important towns for the delivery of the HERALD, until by late breakfast, say nine to ten o'clock, it has reached Saratoga, and the HERALD is being read by the thousands of visitors and citizens of that fashionable watering place, nearly two hundred miles from the place of publication. Such enterprise is admirable and such an accomplishment—wonderful.

Yachting.

The following tables give the titles of the principal yacht clubs in the United States; the names of yachts, with their capacity; the names of owners, and of the officers of each club, from Commodore down.

NEW YORK YACHT CLUB.

OFFICERS.

James Gordon Bennett, *Commodore.*
William P. Douglass, *Vice-Commodore.*
George L. Kingsland, *Rear-Commodore.*
Charles A Minton, *Secretary.*
Shepard Homans, *Treasurer.*
A. Carey Smith, *Measurer.*

MARINERS' GUIDE—1875.

SINCE the first publication of the HERALD ALMANAC, we have received repeated and gratifying assurances from sea-faring men of all grades of the value of the ALMANAC as a work of reference at sea and when entering ports, on the subject of change and location of new light-ships and beacons, and the discovery of heretofore hidden dangers of the deep, which are presented to them in this ALMANAC long before they could be notified of such from official sources.

The information given to mariners in these pages is entirely official, emanating from the Trinity House Admiralty Office, London, from the Hydrographic Office, Washington, and from the various Navigation Boards at the different distant ports of the world (all taken from the columns of the New York HERALD), the only paper that has ever published, for the use of mariners, this most valuable and interesting information, first compiled for the HERALD ALMANAC, and embracing all notices to mariners for the past year.

In continuation to the "Mariners' Guide" and the New Cautionary Signals, will be found full and complete Tide Tables for every day of the year 1875 in all the ports of the United States—accurately calculated tables, showing the sun's declination, and equation of time for every day in the year (1875); a list of the Life-Saving Stations along our coasts; an alphabetical list of the "Bar Ports of the World," with depth of water on bars; Code of Fog-Signals, Atlantic Ocean Steamship Night-Signals, "Funnel-Marks," etc.—all presenting a fund of information indispensable to the mariner and navigator, and which can only be found in the HERALD ALMANAC for 1875.

TIDE TABLE 1.

SHOWING THE TIME OF HIGH WATER AT GOVERNOR'S ISLAND, BAY OF NEW YORK, FOR THE YEAR 1875.
FOR HIGH WATER AT SANDY HOOK, DEDUCT 40 MINUTES FROM GOVERNOR'S ISLAND.

Spring Tides.....5.4 feet. Neap Tides... .....3.4 feet. Average.....4.3 feet.

TIDE TABLE 2.

Showing the differences between the time of High Water at New York and the following places. The hours and minutes standing against the place in this table are to be added to or subtracted from the time of High Water at New York on any given day, which will give (nearly) the time of High Water at the following places:

\+ Signifies add. — Signifies subtract.

* This column shows the vertical rise of the Tides in feet.

NOTICE—In finding the time of High Water at the several places in Table 2, if the sum of the time in Table 2, added to that in Table 1 is more than 12 hours, subtract 12 hours from it, and the remainder will be afternoon of the given day when the time is morning in Table 1. But when the time is afternoon in Table 1, the remainder will be morning of the *next* day. And when the time from Table 2 is subtractive, and greater than in Table 1, add 12 hours to the time taken from Table 1, then subtract, and the remainder will be morning of the given day, when the time in Table 1 is afternoon. But when the time in Table 1 is morning, the remainder will be afternoon on the preceding day.

Bar Ports—Depth of Water.

The following table, compiled from the United States Coast Survey reports, shows the depth of water on the bars named :—

THE ATLANTIC COAST.

Apalachicola—Mean low water 13 ft.; high water 14 ft. 1 in.

Beaufort (Old Topsail Inlet)—Mean low water 15 ft.; mean rise and fall of tide 2 ft. 8 in.

Berbice, British Guiana—Mean low water 6 ft.; rise 9 ft.

Brazos Santiago—Low water (winter months) 8 ft.; (summer months) 6 ft.

Charleston—Mean low water 11 ft.; high water 16 ft. 1 in.

Darien or *Doboy*—Mean low water 15 ft. 5 in.; high water 22 ft. 1 in.

Demerara, British Guiana—Mean low water 10 ft.; rise 9 ft.

Fernandina—Mean low water 11 ft.; high water 16 ft. 8 in.

Galveston—Mean low water 12 ft.; high water 13 ft. 1 in.

Hatteras Inlet—Mean low water 14 ft.; high water 17 ft. 6 in.

Mobile—Mean low water 21 ft.; high water 22 ft.

Minatitlan, Mexico—Mean low water 12 ft. 6 in.; rise 3 ft.

Matamoras, Mexico—Mean low water on the bar at the mouth of the Rio Grande 7 ft.; rise 1 ft.

Maracaibo, Gulf of Mexico—Mean low water 11 ft.; rise 2 ft. 6 in.

Nassau, N. P.—Mean low water 17 ft. This bar is rocky, and is only safe for 15 ft.

New York—Mean low water 21 ft.; average rise and fall of tide 5 ft.

Pass a l'Outre—Mean low water 12 ft.; high water 13 ft.

Pensacola—Mean low water 22 ft. 5 in.; high water 23 ft. 5 in.

Port Royal (South Channel)—Mean low water 19 ft. 5 in. South-east Channel—Mean low water 21 ft.; mean rise and fall of tide 6 ft. 6 in.

San Luis Pass—Mean low water 8 ft.; high water 9 ft. 1 in.

South-West Pass—Mean low water 18 ft.; high water 19 ft.

St. Andrew's Inlet (Main ship channel)—Mean low water 13 ft.; high water 14 ft.

St. Augustine—Mean low water 7 ft.; high water 11 ft. 2 in.; half tide 9 ft.

St. George's Sound—Mean low water 15 ft. 5 in.; high water 17 ft. 1 in.

St. Mark's—Mean low water 9 ft.; high water 11 ft. 5 in.

St. Simon's Sound—Mean low water 15 ft.; high water 21 ft. 8 in.

Tampa Bay—Mean low water 19 ft.; high water 20 ft. 4 in.

Tampico, Mexico—Mean low water on the bar 10 ft.; rise 2 ft.

Wilmington (New Inlet bar)—Mean low water 8 ft.; high water 12 ft. 5 in. [Captain J. B. Lawton, Harbor Master, reports the following soundings: Western bar 10 ft. 8 in.; on the Rip 7 ft. 10 in. These soundings are taken at low tide. A rise of 4½ ft. would give 12 ft. 4 in. on the Rip and 15 ft. 2 in. on the bar.

THE PACIFIC COAST.

Columbia River, Oregon Bar—Mean low water 24 ft.; high water 32 ft.

San Francisco—Mean low water on bar 33 ft.; high water 37 ft.

Tomales Bay—Mean low water over bar 10 ft.; high water 14 ft.

Humboldt Bay—Mean low water on bar, half a mile from shore, 21 ft; high water 25 ft. 7 in.

Koos Bay—Mean low water over bar 11 ft.; high water 16 ft. 7 in.

Umpqua River—Mean low water on bar opposite mid-channel 13 ft.; high water 19 ft.

Shoalwater Bay—Mean low water on bar 18 ft.; high water 24 ft. 5 in.

EAST INDIES.

Kurachee—Mean low water 14 ft.; rise 7 ft.

Rangoon—Mean low water 6 ft.; rise 21 ft.

Moulmein—Mean low water 24 ft.; rise 22 ft.

Bankok—Mean low water 2 ft.; rise 11 ft.

Vizagapatam—Mean low water on bar 8 ft.; rise 5 ft.

BLACK SEA.

Yenekale—Mean low water 13 ft. 6 in.; (noted.)

COAST OF RHODE ISLAND AND LONG ISLAND.

Name.	*Keeper.*
1. Narragansett Pier.	Benjamin Macomber.
2. Block Island.	Samuel Allen.
3. Montauk Point.	Jonathan Miller.
4. Ditch Plain.	Samuel T. Stratton.
5. Hither Plain.	Geo. H. Osborn.
6. Napeague.	Elijah M. Bennett.
7. Amagansett.	Charles J. Mulford.
8. Georgica.	Jonathan F. Gould.
9. Bridgehampton.	Baldwin Cook.
10. Southampton.	Charles White.
11. Shinnecock.	Lewis R. Squires.
12. Tyanda.	Edward H. Ryder.
13. Quogue.	Mahlon Phillips.
14. Tanner's Point	Franklin C. Jessup.
15. Moriches.	William Smith.
16. Fargo River.	Sidney Penny.
17. Smith's Point.	Joseph H. Bell.

Name.	*Keeper.*
18. Bellport.	George W. Robinson.
19. Blue Point.	Daniel A. Nevens.
20. Lone Hill.	Edmund Brown.
21. Point of Woods.	Geo. W. Rogers.
22. Fire Island.	Leander Thurber.
23. Oak Island, East End.	Henry Oakley.
24. Oak Island, West End.	Prior Wicks.
25. Jones's Beach, E. End.	Augustus C. Wicks.
26. Jones's Beach, W. End.	Townsend Verity.
27. Meadow Island.	Leander Lozee.
28. Long Beach, East End.	Daniel W. Smith.
29. Long Beach, W. End.	Charles Wright.
30. Hog Island, West End.	Joseph Langdon.
31. Rockaway Beach, E.E.	Daniel Mott.
32. Rockaway Beach, W.E.	Isaac Skidmore.
33. Sheepshead Bay.	Cornelius VanNostran.

CAPE COD.

1. Race Point, one mile east of light-house.
2. Peaked Hill Bar, three miles from No. 1.
3. Highlands, one mile north of light-house.
4. Parmet River, three miles to southward of Highlands.
5. Cahoon's Hollow, three miles to southward of Parmet.
6. Nausett, one mile to southward of lights.
7. Orleans, on beach, east of Ponchet Island.
8. Chatham, one mile to southward of lights.
9. Monomoy, two miles east of light.

BLOCK ISLAND.

1. Southwest point of Block Island.

STATISTICS OF WRECKS AND SERVICES RENDERED DURING 1873.

Total number of wrecks	32
Number of lives imperiled was	235
Number of lives saved	234
Number of lives lost	1
The number of shipwrecked persons sheltered in station-houses	33
The number of days' shelter afforded	77
Total value of property imperiled	$832,230
Total value of property saved	581,201
Total value of property lost	226,029

OCEAN STEAMER NIGHT-SIGNALS.—The following Ocean Steamer Night-Signals are published for the information of ship-masters, and will enable them to report, when passing steamers at night, the lines to which they belong:

Allan Line—Blue, white, and red rockets in succession.

American Steamship Company's Line (Philadelphia and Liverpool)—One rocket, followed in quick succession by first a red light, then a white light, and then a blue light.

Anchor Line—Red and white lights alternately.

Baltic Lloyd Line (Stettin-American)—Red light forward, two rockets at same time, and red light aft.

Cardiff Line—One red light and one red rocket, both shown from aft at the same time.

Clyde's Line (to Havana)—A red Coston signal.

Cunard Line—Two rockets and blue light simultaneously.

Eagle Line (German Transatlantic S. N. Co.)—One blue light, one rocket, one fire-ball.

Garrison's Line (from New York to Brazil and Savannah)—White and red Coston signal.

Guion Line—Blue lights forward, aft, and on bridge simultaneously.

Hamburg-American Line—Fire-ball, rocket, and fire-ball in succession.

Inman Line—Blue light forward and aft, red light on bridge, and variegated rocket.

John Bibby, Son & Co.'s Line—One red light and one rocket simultaneously.

Lamport & Holt's Line—One red rocket, one white, and one red in succession.

Montreal Ocean S. N. Co.'s Line—Red, white, and blue rockets.

Morgan's Line (to Charleston)—A red and green Coston signal.

National Line—Blue light, rocket, and red light in succession.

New York and Havre Line—Rocket, blue light, and rocket in succession.

North German Lloyd Line—Two blue lights changing to red, one forward and one aft.

Pacific Company's Straits Steamers Line—Red light, two rockets and blue light in succession; firing a gun signifies a wish to communicate.

Peninsular and Oriental Company's Steamers Line—Two rockets and blue light simultaneously.

Royal Mail Company's Steamers Line—Rocket and blue light simultaneously; firing a gun and dipping mast-head light signifies wish to communicate.

State Line—Red light, rocket, and two blue lights, one forward and one aft.

Stettin-American Line—Red light forward, red light aft, two rockets at the same time.

Transatlantic French Line—Two rockets forward, one gun, and two rockets aft.

West India and Pacific Line—Green rocket, blue and red light simultaneously.

White Star Line (Oceanic S. N. Co.)—Green light, rocket throwing two green stars, and green light in succession.

FUNNEL-MARKS.—The following funnel-marks of the ocean steamer lines will be found useful in distinguishing passing steamers in the day-time:

American Steamship Line (Philadelphia and Liverpool)—Red, with a narrow white and black band at the top, and a white keystone on each side.

Anchor Line—Black.

Baltic Lloyd (Stettin-American) *Line*—White, with narrow black top.

Bremen Line—Black.

Cardiff Line (South Wales Atlantic S. S. Co.)—Black, with two white stripes round the top.

Cunard Line—Red, with black top.

Eagle Line—Black, with white and red band.

Great Western Line—Red band, with a ball half blue and half white on each side.

Guion Line—Lower two-thirds black, a red band and black top.

Hamburg-American Line—Black.

Inman Line—The lower two-thirds black, a white band and black top.

National Line—White, with black top.

State Line—Lower two-thirds buff, with red band and black top.

Transatlantic French Line—Red, with black top. All of these vessels have a "wind fly" at each royalmast-head.

White Star Line (Oceanic S. N. Co.)—Yellow, with black top.

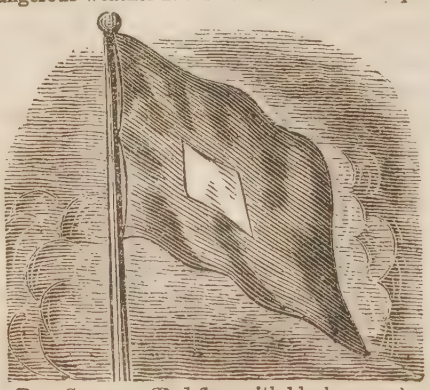
The New Cautionary Signals.

[A most important step has been taken by the United States Signal Service in the establishing a system of signals by which, at the earliest possible moment, the landsman and the mariner are notified of the approach and force of storms and violent gales of wind. These signals, with full explanatory notes, were first presented to the public in the columns of the HERALD of October '71, from which is extracted the subjoined official text as to the meaning and use of such signals:]

THE CAUTIONARY SIGNAL.

The cautionary signal of the Signal Service, United States Army—a red flag with black square in the center by day and a red light by night—displayed at the office of the observer and other prominent places throughout any city signifies:

1. That from the information had at the central office in Washington, a probability of stormy or dangerous weather has been deduced for the port



DAY SIGNAL—(Red flag, with black square).

or place at which the cautionary signal is displayed, or in that vicinity.

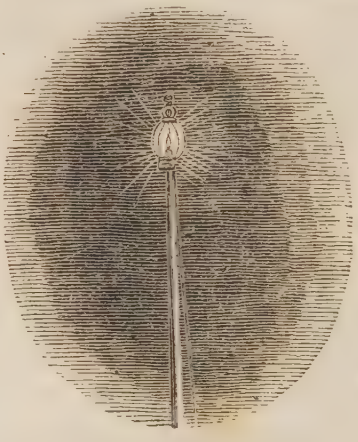
2. That the danger appears to be so great as to demand precaution on the part of navigators and others interested, such as an examination of vessels or other structures to be endangered by a storm, the inspection of crews, rigging, etc., and general preparation for rough weather.

3. It calls for frequent examination of local barometers and other instruments by ship captains or others interested, and the study of local signs of the weather, as clouds, etc. By this means those who are expert may often be confirmed as to the need of the precaution to which the cautionary signal calls attention, or may determine that the danger is over-estimated or past.

THE WEATHER SIGNALS EXPLAINED.

The signals as displayed from the flagstaffs mean thus:

A red flag or flags, with black square in center, and cylinder on center pole by day, and red lights at night, mean that from information had at the



NIGHT SIGNAL—(Red Lantern).

central office, in Washington, dangerous winds are anticipated for the vicinity of New York city.

Some persons are under the impression that when the cylinder is up without the flags, or *vice versa*, something else is meant in each case; but this is wrong. There is but one signal comprising all the apparatus.

CODE OF FOG SIGNALS.—Sailing vessels, and every craft propelled by sails upon the ocean, lakes and rivers, shall, when on their *starboard tack, sound one blast of their fog-horn*; when on their *port tack* they shall sound *two blasts* of their fog-horn; when with the wind, free or running large, they shall sound *three blasts* of their fog-horn; when lying to or *at anchor* they shall sound *a general alarm*. In each instance, the above signal shall be sounded at intervals of not more than *two minutes*.

Sailing vessels, when not under way, and anchored or moored in the channel or fairway of commerce, shall sound the general alarm signal at intervals of not more than *two minutes*, and all *steamers* navigating in a fog or thick weather, shall, by the rule governing pilots, sound their *steam whistles* at intervals of not more than *one minute*.

It shall at all times be the duty of steamers to give to the sailing vessel, or other craft propelled by sails, every advantage, and keep out of her way.

GEO. S. BOUTWELL,
Secretary of Treasury.

American Waters and Coast Line.

"THE CUCKOLDS," NEAR TOWNSEND HARBOR, MAINE.

January.—A wooden tripod, 57 feet high, has been erected on the southern end of the most eastern of "The Cuckolds," off Cape Newagen, on the west side of western entrance to Townsend Harbor, Maine. The feet of the structure are of wrought iron, set into the ledge, 12 feet above high water mark; the upper half is covered with boards, and is painted black.

The bearings by compass and distances in nautical miles of prominent objects are as follows:—

Burnt Island light-house bears N. NE. 2⅞ miles.

Hypocrite Ledge bears E. 2⅜ miles.

Damiscove Island (north point) bears E. by S. 1¾ miles.

Seguin light-house bears SW. by W½W. 6¼ miles.

EASTERN EGG ROCK, MUSCONGUS BAY, MAINE.

A wooden tripod, 54 feet high, has been erected on the northern end of Eastern Egg Rock. The rock on which it stands is 6 feet above high water mark. The upper half is covered with boards and painted red.

The bearings by compass and distances in nautical miles of prominent objects are as follows:—

Franklin Island light-house, N. NE. 1¾ miles.

Davis Straits, E. by N. ¼ N. 3⅜ miles.

Manheigan light-house, S. by E. 6⅜ miles.

Manheigan fog signal on Manana Island bears S. ½ N. 6¼ miles.

Pemaquid Point light-house bears W. ¼ S. 5⅜ miles.

FLASHING RED LIGHT AT PENFIELD REEF, LONG ISLAND SOUND.

February.—The illuminating apparatus is a lens of the fourth order, flashing red every 10 seconds.

The focal plane is at a height of 54 feet above mean low water.

In clear weather, the eye being 15 feet above the sea level, the light should be seen at a distance of 13 nautical miles.

The tower which surmounts the keeper's dwelling, and parapet of the lantern are painted white. The dome of the lantern is painted black.

Approximate position:

Lat. 41 7 3 N., lon. 73 12 51 W.

From the light-house the following bearings and distances in nautical miles are given:—

Black Rock light-house, N. by E. ¼ E. 1½ miles.

Bridgeport light-house, NE. 3 miles.

Huncher day beacon, NE. by E. ¼ E. ¼ mile.

Stratford Point light-house, E. by N. ¼ N. 5¾ miles.

Stratford Point light-ship, SE. ¼ E. 6¾ miles.

Old Field Point light-house, S.SE. 9¾ miles.

Eaton's Neck light-house, SW., 12¾ miles.

Norwalk Island light-house W. by S. ⅜ S. 10 miles.

DAY BEACON ON BLACK LEDGE, NEW LONDON HARBOR.

The beacon is on the northerly end of the ledge. It is built of granite, is 15 feet in diameter at top, and 12 feet above low water mark. It is surmounted by a shaft and cage of iron, 20 feet in height.

The bearings by compass, and distances in nautical miles of prominent objects, are as follows:—

New London light-house, NW. ¾ W. 1⅛ miles.

Sea Flower day beacon, SE. by E., 1⅓ miles.

North Dumpling light-house, SE. by E. ¼ E. 2½ miles.

Race Rock, S. ¾ E. 3¾ miles.

Little Gull Island light-house, S. SW. 6 miles.

Bartlett Reef light-ship, SW. by W. ⅛ W. 3¼ miles.

PENFIELD REEF, LONG ISLAND.

The new light-house on Penfield Reef, L. I., commenced lighting on the 16th of January. The light is a red flash, and of the fourth order, and is considered one of the most important upon Long Island Sound, both by masters of steamers and sailing vessels traversing the north shore.

FOG SIGNAL AT MARE ISLAND, CAL.

February.—On and after Feb. 15, 1874, a fog bell will be established at the light station at Mare Island, California, and will be sounded every 10 seconds during thick and foggy weather.

FOG SIGNAL AT NEW DUNGENESS LIGHT-HOUSE, W. T.

On and after Feb. 1, 1874, a steam fog whistle will be sounded during thick and foggy weather at New Dungeness light station, Straits of Juan de Fuca, W. T.

The fog signal house is 400 feet NE. from the light-house.

The characteristic distinction of this whistle is that blasts of 6 and 3 seconds duration will be sounded at intervals of 12 and 39 seconds.

DAY BEACON ON HARDING'S LEDGE, BOSTON HARBOR.

A day beacon has been erected at a point 3 feet above low water mark, on Harding's Ledge, entrance to Boston harbor.

The beacon is a wrought iron shaft, 15 inches in diameter at bottom and 5 inches diameter at the top.

The top of the shaft is 31½ feet above the ledge, and bears a day mark, which is a cast iron ring or wheel, 4 feet in diameter, set horizontally, with 12 wooden pendants, 5 feet in length, attached to the rim. The shaft and day mark are painted black.

Bearings by compass and distances:—

Point Allerton Bar buoy bears NW. by W. distant 1⅝ miles.

Boston light-house, NW. 2¼ miles.

Martin's Ledge, N. 2⅜ miles.

Graves bell buoy, N. 3⅞ miles.

Davis' Ledge buoy, SE. ¾ E. 4⅞ miles.

Minot's Ledge light-house, SE. ⅛ E. 4¼ miles.

CHAPEL HILL BEACON, NEW YORK BAY.

The front of Chapel Hill dwelling, which supports the light tower, shows from the direction of the main channel of the bay a surface of 25 feet by 40 feet, painted white. Frames of same dimensions, each 25 feet by 40 feet, and covered with boards, are shown on each end of the dwelling, and are colored black.

The surface of the entire front is therefore 25 feet by 120 feet, and shows white between two black surfaces. The distance from Southwest Spit buoy to Chapel Hill beacon is five miles.

CONOVER BEACON.

Frames, each 25 feet by 20 feet, and covered with boards, are built on each side of Conover-beacon light tower, and are colored black.

The tower is painted in horizontal belts of white, red and white. The surface of the entire front is 25 feet by 60 feet, and shows the tower painted in belts of white, red and white, between two black surfaces. The distance from Southwest Spit buoy to Conover beacon is 3½ miles.

ST. JOHN'S RIVER, FLA.

March.—A new channel has recently been opened through the bar at the mouth of St. John's River, Fla. It is short, straight and of good width, following the line of beach and opening well to the south. Vessels drawing 11½ feet of water have been taken through the new channel, which is steadily improving, and will eventually be, if not already, the main channel.

SUNKEN ROCKS OFF FORT POINT, SAN FRANCISCO HARBOR.

The first rock lies 340 feet off shore, NW. by N. from Fort Point light-house, with 9½ feet on it and 3 fathoms close to it, the water deepening to 7 fathoms at a distance of 500 feet outside.

The second rock lies 360 feet off shore, NE. by N. ¾ N. from Fort Point light-house, with 11 feet on it and 4 fathoms close to it, the water deepening very rapidly outside. A rock, bare at low water, lies half way from the second sunken rock to the shore and nearly in range with the eastern edge of the fort, and another bare at low water 300 feet W., ¼ S. from this.

SHOAL SPOT IN SAN FRANCISCO BAY, CALIFORNIA.

April.—Professor George Davidson, of the United States Coast Survey, has issued the following:—

In the detailed survey of San Francisco Bay by Assistant Gershom Bradford, a ridge having less than seven fathoms upon it has been developed.

The ridge stretches in an irregular curved line from the northwest point of Alcatraz Island to the eastern end of the Presidio Shoal, and has an average width of 100 yards within the seven-fathom line. The depth of water upon it is not regular, and the shoalest spot yet discovered has but four fathoms of water, over gravelly bottom, at the mean of the lowest tides; but at the lowest spring tides there will be only 23 feet upon it. This spot lies in the regular track of vessels and is a danger to those of large draught. It is about 100 yards long, and the water around it deepens gradually to 6 fathoms S. by W. and N. by E. It lies S. 59 deg E. (SE. by E. ½ E.) by compass distant 700 yards from Bird Rock, and S. 52 deg. W. (SW. by W. ½ W.) by compass distant, 1,260 yards from Alcatraz Light. The following ranges also locate it—Shag Rock on with the eastern tangent of Peninsula Point; and Boneta Light over the first small rise back of the brow of Point Diablo. The range Boneta Light and the extremity of Point Diablo passes one-fifth of a mile south of the shoal spot. Work upon this locality has not been completed.

NEW JERSEY—LIGHT-HOUSE AT HEREFORD INLET.

May.—The illuminating apparatus is of the fourth order of the system of Fresnel, illuminating 270 deg.

The focal plane is 49½ feet above the ground and 57 feet above mean low water.

The light should be seen in clear weather from the deck of a vessel 15 feet above the sea, 13 nautical miles.

The structure is of wood and placed in a grove. The tower surmounts the dwelling, and both are painted straw color, the lantern black.

Bearings and distances:—

Cape Henlopen light-house, SW. ¼ W. 19½ nautical miles.

Cape May light-house, SW. by W. ¾ W. 9½ nautical miles.

Five Fathom Bank light-ship, SE. ¼ S. 12⅝ nautical miles.

Absecom light-house, NE. ¼ N. 27¼ nautical miles.

EAST END OF HORN ISLAND, GULF OF MEXICO LIGHT-HOUSE.

The light white, varied by red flashes, at intervals of one minute.

The illuminating apparatus is dioptric, of the fourth order, lighting 360 degrees of the horizon.

The focal plane is 43 feet above mean low water.

The light should be seen in clear weather from the deck of a vessel 15 feet above the sea, 12 nautical miles

The approximate position of the light-house as taken from the Coast Survey charts, is as follows:—Lat. 30 13 N., lon. 88 29 W.

Magnetic bearings and distances are as follows: Round Island light-house, NW. ½ N., 5¼ nautical miles; Sand Island light-house, E. ¼ N. 24⅛ nautical miles.

Horn Island, on west side of Horn Island Pass, is about 12 miles long and wooded nearly its entire length. The light-house on the land is about 1,500 feet from the extreme eastern end. The pass may be known by the appearance of Petit Bois Island on east side of it, which is about 11 miles long, with two clumps of woods, about two miles apart, on the west half of the island, with a group of large sand bills between them.

THE LIGHT-HOUSE ON PETER ROCK, OR GULL ISLAND.

June.—The light-house on Peter Rock, or Gull Island, near Port Hope, Lake Ontario, has been destroyed by fire.

A temporary light will be exhibited until a new light-house is erected.

MASSASOIT CHANNEL.

July.—Two spar buoys have been placed to mark the channel to Massasoit Dock, Fall River, Mass.

No. 1—Black, in 8 feet water, W. of Massasoit Ledge and on the edge of the port side of the Dugout. Bearings—N. corner of Steamboat Dock, W. ½ N.; NW. corner Rodman's Dock, N. NE.; W. corner Massasoit Dock, SE. by E.

No. 2—Red, in 5 feet water, on a bunch of rocks on the starboard side of the Dugout. Bearings—N. corner of Steamboat Dock, W. by N. ¼ N; NW. corner Rodman's Dock, N. by E.; W. corner Massasoit Dock, E. NE.

CHANGE IN ST. JOHN'S BAR, FLORIDA.

The channel has changed to the southward about 100 yards. What was formerly the south breaker for the old channel, is now the north breaker for the new channel. The channel is straight. The old light-house, from the sea buoy, bears due west. The course over the bar is due west. There is from 11½ to 12¼ feet at ordinary spring tide. The channel is further to the southward now than it has been since 1842.

SUNKEN ROCK OFF MIDDLE FARALLONE.

August.—The United States Coast Survey gives notice of a sunken rock recently discovered near the Middle Farallone. The rock has 5¼ fathoms of water on it at low water, with deep water 8 to 15 fathoms close around it, but with a high sea on a break has been seen upon it by pilots and the light-house keeper. It lies S. 25 W. by compass, distant ⅜ of a mile from the Middle Farallone, and N. 72 W., distant 2¼ miles from South Farallone light-house. The water between this rock and the Middle Farallone reaches 18 fathoms, and from 15 to 20 fathoms between it and the South Farallone.

NEW SHOAL—SWASH CHANNEL.

The new shoal recently developed on the south side of the Swash Channel is now marked by a spar buoy, horizontal stripes, in 11½ feet water at mean low water, from which the bearings of prominent objects are as follows;—

Sandy Hook east and west beacons exactly in range, S. ½ W.

New Dorp beacon and a very tall tree on the heights back of this light in range, NW.

New Dorp beacon well open to the northward of Elm Tree beacon, apparently about 30 feet.

Romer Stone beacon and Fort Tompkins' flagstaff very nearly in range, the flagstaff bearing from the buoy, N. by W. ½ W.

FIXED WHITE LIGHT AT BIG SABLE, LAKE SUPERIOR

The illuminating apparatus is dioptric or by lenses. of the third order, lighting 288 deg. of the horizon.

The focal plane is 107 feet above the level of the lake.

The light should be seen in clear weather from the deck of a vessel 10 feet above the lake, 17¼ statute miles.

The tower and dwelling are built of brick, white-washed, and are connected by a passage way.

Approximate position of the light-house—Lat. 46 41 N., lon. 86 9 W.

Magnetic bearings and distances—Grand Island Light, W. by S. ¼ S., 22¼ nautical miles.

THE LIGHT ON VANCOUVER ISLAND.

The new light on Cape Beal, Vancouver Island, B. C., can be seen very plain on clear nights from Tatoosh light, distant over 30 miles. It is a small revolving reflector light, and will be invaluable dark winter nights to vessels approaching the coast from the westward, giving them a true course for Tatoosh light and the Straits of Fuca.

CHANNEL RANGE, CHESAPEAKE BAY.

In addition to the present fifth order light, illuminating the entire horizon from Craighill beacon, a fixed white range light, similar to the one on the rear beacon, visible only on the range of channel it marks, has been erected. The focal plane is 17 feet above mean low water. The light should be seen in clear weather from the deck of a vessel fifteen feet above the sea, 9 nautical miles.

NEW YORK HARBOR—WRECK OF THE SCOTLAND LIGHT-VESSEL.

A light-vessel has been placed on the station near the entrance to New York Bay, known as the Wreck of the Scotland.

The lights are two in number, fixed white.

These lights should be seen in clear weather, from the deck of a vessel 15 feet above the sea, 12 nautical miles.

The vessel has two masts, schooner rigged, with circular cagework daymarks. The hull is painted lead color, with "Wreck of the Scotland" painted in large black letters on each side. She will be moored in 7 fathoms of water, and from her position the Elm Tree beacon light (Swash Channel range) shows to the right of the New Dorp beacon light.

Magnetic bearings of prominent objects are as follows:—

Bar buoy, south channel, NE. ¼ N.
Sandy Hook lightvessel, E ¼ S.
Highlands of Navesink lights, SW. ¼ S.
Sandy Hook main light, NW. by W. ½ W.
Sandy Hook east beacon, NW. ¾ W.
By order of the Light-house Board.

LIGHT-HOUSE ON ANASTASIA ISLAND, ENTRANCE TO ST. AUGUSTIN, COAST OF FLORIDA

September.—The light is fixed white, varied by flashes every three minutes.

The illuminating apparatus is dioptric, of the first order, lighting the entire horizon.

The focal plane is 150 feet above the ground, and 165 feet above mean low water.

The light should be seen in clear weather, from the deck of a vessel 15 feet above the sea, 19 nautical miles.

The structure is ¾ of a mile SW. ¾ S. from the old tower, and the same distance from the sea shore. It is of brick, conical in form, and is placed on an octagonal base of brick and iron.

The approximate position of the light-house as taken from the survey charts is as follows:

Lat. 29 53 03 N., lon. 81 17 09 W.

Magnetic bearings and distances of prominent objects are as follows:

Cape Canaveral light bears SE. by S. ½ S., 96 nautical miles.

St. John's River light bears N. by W. ¼ W., 32 nautical miles.

SCREW PILE LIGHT AND FOG BELL AT HATTERAS INLET.

The light shows red flashes at intervals of thirty seconds between the flashes, when there will be a total eclipse. The light should be seen in clear weather from the deck of a vessel 15 feet above the sea, 11 nautical miles. The structure is square, upon 5 piles, and stands in 7 feet of water on the end of Oliver's Reef, Pamlico Sound, and on the north side of Hatteras Inlet. The lantern is painted red, the wood work white, and the roof and iron work brown. A fog bell on the west side will be sounded during foggy weather at intervals of eight seconds.

SAN LORENZO CHANNEL, CALIFORNIA.

An iron buoy has been placed on the NW. extremity of Scout Shoal, in the San Lorenzo channel.

The buoy is moored in 5 fathoms of water, with the following bearings:—

Point Diablo, S. by W. ⅞ W.
Dispensa Point, NW. by W. ¼ W.
Point Lobos, N. ¼ E.
Coyote Point, E. ¼ S.

These four landmarks are the extreme points in sight in their respective directions.

San Lorenzo Reef (8 feet patch) bears from the buoy N. by W. ½ W., one mile and one-tenth distant.

Bearings magnetic. Variation, 10 degrees easterly in 1874.

BREESE ROCK BUOYED.

October.—Notice is given that the rock recently discovered in Long Island Sound by Capt. Breese, U.S.N., known as Breese Rock, is now marked by a first-class spar buoy, painted with red and black horizontal stripes, in six fathoms of water.

The bearings of prominent objects per compass are:—Little Gull Island light-house, N. ¾ E; Gardiner's Island light-house, SW. by S.; east end of Plum Island, NW. by W.

DISTINGUISHING SIGNALS OF VESSELS EMPLOYED IN LAYING CABLES.

Vessels employed in laying down or taking up telegraph submarine cables, will carry the following distinguishing signals.

In day time, two black balls, one over the other, at the fore or foretopsail yard-arm.

At night, two red lights (lanterns) one above the other, also at the fore or foretopsail yardarm.

The white light usually carried will be dispensed with while the above lights are displayed.

NEW LIGHT-HOUSE ON LAKE SUPERIOR.

WASHINGTON, D. C., Oct. 14, 1874.

The Light-house Board gives notice that on and after Oct. 20 a light will be shown from the light-house recently erected on the most southerly point of Outer Island, one of the Apostle group, in Lake Superior.

The illuminating aparatus is catadioptric, of the third order, showing a brilliant white flash every 90 seconds, preceeded and followed by short eclipses.

NEW LIGHT IN HUDSON RIVER.

The Light-house Board gives notice that on and after Nov. 1 a light will be shown from the light-house recently erected at the south end of Middle Ground, Hudson River, opposite the city of Hudson, N. Y. The light will be a fixed white.

LIGHT AT WINTER QUARTER SHOAL, VA.

November.—A light vessel is placed about two miles outside of Winter Quarter Shoal, Va., bearing per compass from centre of shoal, SE. by E. ½ E.

The vessel will show one fixed white light, which should be seen in clear weather from the deck of a vessel 15 feet above the sea, 11 nautical miles.

The vessel has two masts, schooner rigged, with circular cagework day marks. The hull is painted red, with "Winter Quarter" painted in large white letters on each side. She will be moored in about 11 fathoms of water.

The approximate position of the light vessel will be lat. 37 57 N., lon. 75 05 30 W.

Africa—Coasts and Harbors.

EAST COAST—MOZAMBIQUE CHANNEL—RIVER QUILIMANE.

June.—Information has been received that a light is now exhibited from a light-house on Taugalane Point, east side of the entrance of Quilimane River.

The light is a fixed white light, visible seaward, or between the bearings NE. by E. ½ through N. and S. to SW. by W. ¼ W., elevated 52 feet above the level of the sea, and in clear weather should be seen from a distance of 12 miles.

The illuminating apparatus is dioptric.

The tower is built of iron and stone, and is painted white.

Position—Lat. 18 01 20 S., lon. 37 01 30 E.

WEST COAST—THE BAR OFF THE SENEGAL RIVER.

October.—The general trend of the channel acros the bar of the Senegal river has changed somewhat in a northern direction, and forms at present a line running from N. to S.SW., a distance of about 130 feet, varying in depth from 9½ to 10¾ feet, the bar having moved to the southward about 220 yards since March 15, 1874.

The entrance to the channel is on the following bearings:—Pilot pole, N. 32 deg. E.; pole of Mouette, S. 8 deg. E.

The flood tide generally runs NE., attaining a rate of 2½ knots; the ebb tide runs irregularly between S. and SW., following the channel, and attains a velocity of 4 knots.

Bearings magnetic. Variation, 20 deg. westerly in 1874.

LIGHTS AT MONROVIA AND CAPE PALMAS.

Information has been received that the light at Monrovia is on the summit of Mount Mesurado, about half a mile N. by E. of the cape, and just back of Mamba Point.

The tower is out of repair, and the light—a globe lantern, 12 inches in diameter—is hoisted on the flagstaff, about 20 yards SW. of its former position. The light is very poor, and can be seen only five or six miles.

The light on Cape Palmas is again shown, but is so inferior that it can only be seen at a distance of two or three miles.

Particular care is necessary in navigating this coast, as the lights are frequently not lighted, and when lighted, very indifferent.

Australian Waters and Coasts.

NORTHEAST COAST—REPORTED DANGER NEAR CAPE MELVILLE.

January.—The colonial government of Queensland has given notice that the master of the schr Hannah Bloomfield reports having struck on a mushroom-shaped coral patch in the inner route, near Cape Melville.

This danger, Bloomfield Rock, has about 4 feet over it at low water, and 15 fathoms close to.

From it Cape Melville bears W. by N. ¼ N; Barrow Point S. by E., and Rocky Point SW. by W. ½ W.

These bearings place the danger in lat. 14 12 40 S., lon. 144 40 30 E.

Bearings magnetic. Variation, 7½ degrees easterly in 1873.

EAST COAST—QUEENSLAND—FIXED LIGHT ON CAPE BOWLING GREEN.

March.—The colonial government of Queensland has given notice that during the construction of a light-house a temporary light is now exhibited on Cape Bowling Green.

The light is a fixed white light, elevated 30 feet above the level of high water, and in clear weather should be seen from a distance of 9 miles.

Position—Lat. 19 19 20 S., lon. 147 27 20 E.

SOUTH COAST—ROCK IN SPENCER GULF.

April.—Further notice has discovered the rock on which the cutter Secret was lost, in the following position:

One-half sea mile E. by S. from the first red cliff point north of Point Bolingbroke, and is about 50 yards north and south, and 20 yards east and west. Its summit should be awash at low water spring tides. Inside of this rock there are from 2 to 3 fathoms water, and the bottom is rocky and uneven for more than half a mile outside in an easterly and southeasterly direction.

Approximate position—Lat. 34 31 20 S., lon. 136 4 30 E.

Bearings magnetic. Variations, 7¼ easterly in 1873.

SOUTH COAST—PLACING OF A BUOY IN LACEPEDE BAY.

Notice is given that a black and red checkered buoy, with beacon top, has been placed in Lacepede Bay, on a shoal patch having only 1¾ fathoms water on it at low water spring tides.

This shoal lies directly in the track of vessels bound to and from Kingston, and bears W. by S., distance nearly 1⅜ sea miles from the inner end of Kingston Jetty.

Vessels drawing more than 12 feet should not approach it within 600 yards on either side.

Bearings magnetic. Variation, 6½ easterly in 1874.

QUEENSLAND—PIONEER RIVER—TEMPORARY LIGHT ON FLAT-TOP ISLAND.

The colonial government of Queensland has given notice that a temporary light is now exhibited from the signal station on Flat-top Island, off the entrance of Pioneer River.

The light is elevated 220 feet above the level of the sea, and in clear weather should be seen from a distance of about 10 miles, except when on a W. NW. bearing. It is then obscured for about a quarter of a point by Round-top Island. Position—Lat. 21 10 15 S., lon. 149 12 30 E.

All bearings are magnetic. Variation, 7¾ degrees easterly in 1874.

SOUTH COAST—ST. VINCENT'S GULF—PORT ADELAIDE.

May.—A light-vessel has been moored in 6 ¼ fathoms at low water, 1 ¾ miles west of Glenelg Jetty, Port Adelaide.

The lights are fixed white, two in number, vertical and 3 feet apart.

PORT PHILLIP—LEADING LIGHTS IN SOUTH CHANNEL.

August.—Eastern light, immediately under Arthur's seat, is a fixed light, showing red between the bearings S. by W. ½ W. and SE. ¼ E., and white between SE. ¼ E. and E. by N. ½ N., elevated 80 feet above the level of high water, and in clear weather the white light should be seen from a distance of 14 miles.

South Channel Pile light, at the eastern end of the channel, in the position occupied by No. 10 buoy, is a fixed light, showing red between the bearings W. ½ S. through N. to NE. ¼ N., and white between NE. ½ N. and S.SE., between S.SE. and W. ½ S. the light is obscured; it is elevated 27 feet above the level of high water, and in clear weather the white light should be seen from a distance of 10 miles.

The illuminating apparatus of both lights is dioptric or by lenses of the fourth order.

DIRECTIONS.—Vessels entering the south channel from seaward, should steer in with the lights in line, showing white, bearing E. ¼ S., but vessels of large draught should, on approaching within a quarter of a mile of the South channel Pile lighthouse, open the eastern light well to the northward of the Pile light, in order to avoid the 20 feet patches recently discovered. After passing the Pile light-house, steer about east and into the red color of the Pile light before reaching No. 13 buoy. When the eastern light shows red the vessel will be clear of the east end of the Middle Ground, and may steer for Melbourne or Geelong.

Vessels leaving for sea by the south channel, having made the eastern light, red, should steer for it until the Pile light is seen, red, bearing W. ½ S. when a course may be shaped for the latter so as to pass on the north side, and when passed the leading lights in one, with the course W. ¾ N., will lead through the channel.

When to the northward and in the vicinity of the Middle Ground and Great Sand, sailing vessels working down will know they are standing into danger when either the South Channel Pile light or the eastern light shows white; they will also know their proximity to the eastern shore when the eastern light ceases to be visible.

ANCHORAGE.—Vessels may find safe anchorage in Capel Sound with the Pile light showing red.

All bearings are magnetic. Variation, 8½ deg. easterly in 1874.

QUEENSLAND—REPORTED SHOAL IN LAGUNA BAY.

September.—A shoal or bank called "Jew Bank," has been reported in Laguna Bay, on which the sea breaks heavily in heavy weather.

On examination by Staff Commander Bedwell, on the shoal, which was small, the least water found was 23 feet, 1½ miles north from Low Bluff, Noosa Head.

Mount Isabel on with the small Laguna Hill, SW. ½ S., leads to the northward of the bank, and Custom Hill, on with the southern part of Low Bluff, south, clears it to the eastward.

Bearings magnetic. Variation, 9¾ degrees easterly in 1874.

Canadian Waters.

SABLE ISLAND, NOVA SCOTIA.

January.—A light-house has been erected by the goverment of Canada on the west end of Sable Island, Nova Scotia, in lat 43 47 N., lon. 60 08 W.

A revolving white light, elevated 123 feet above high water, is shown from the light-house, making a complete revolution in 3 minutes, and showing 3 distinct flashes at intervals of half a minute, there being a cessation of the light during the minute and a half in each revolution. In clear weather the light will probably be seen at a distance of about 18 miles.

The tower is an octagonal wooden building, 98 feet high, and painted white.

The illuminating apparatus is catoptric.

The light was first shown Nov. 15, 1873.

STEAM FOG WHISTLE.

Notice is also given that a steam fog whistle has been erected in the vicinity of the light-house, and directions have been given for sounding it during thick weather, fogs, and snow storms, 8 seconds in each minute, leaving an interval of 52 seconds between each blast.

The whistle will probably be heard in calm weather or with the wind from 10 to 15 miles, and in stormy weather or against the wind from 3 to 6 miles, according to the state of the atmosphere.

A fixed white dioptric light is also exhibited from the light-house erected on the East end of the island, the distance between the light-houses being about 20 miles.

MAGDALEN ISLANDS—LIGHT ON THE WEST SIDE OF GRINDSTONE ISLAND.

A light-house has been erected near Etang du Nord, on the west side of Grindstone Island, one of the Magdalen Islands in the Gulf of St. Lawrence.

A revolving white light will be exhibited from the light-house on the 20th of April next, showing a flash every minute and a half, and making a complete revolution every 3 minutes.

The light is about 200 feet above the level of the sea, and will probably be seen at a distance of 20 miles.

The tower is a square wooden building, 28 feet high, with dwelling attached, painted white.

The illuminating apparatus is catoptric.

Position of light-house—Lat. 47 23 30 N., lon. 61 58 W.

NEWFOUNDLAND LIGHTS.

A light-house has been erected on the eastern head of Rose Blanche Point.

Position—Lat. 47 35 48 N., lon. 58 41 20 W.

A fixed white light is exhibited at an elevation of 95 feet above the level of the sea, which should be seen in clear weather a distance of 13 miles.

The illuminating apparatus is dioptric, of the fourth order.

The light illuminates the horizon from E. by S., through S. to W. by compass.

Shag Island Black Rocks bear W. from the lighthouse, distant about 1 mile.

Rose Blanche Shoals W.SW., distant ½ mile.

Petites Black Rock E. by S., distant 3 miles.

The light-tower is attached to the keeper's dwelling, and they are built of granite.

FORT POINT, TRINITY HARBOR.

A wooden light tower (painted white) has been erected on Fort Point, at the entrance of Trinity Harbor, and a fixed white light exhibited thereon,

at an elevation of 75 feet above the level of the sea. Position—Lat. 48 21 55 N., lon. 53 20 51.

In clear weather the light should be visible 11 miles.

The illuminating apparatus is dioptric, of the eighth order, with a single argand burner. Illuminated arc 320 degrees.

In entering the harbor keep the light on the port hand.

GREAT MANITOULIN ISLAND LIGHT.

February.—A light-house has been erected on the southwest end of Great Manitoulin Island, in the District of Algoma, in Lake Huron.

Position—Lat. 45 53 10 N. lon. 83 6 20 W.

The light is a fixed white light, shown from a square wooden building, 28 feet high, and painted white.

The illuminating apparatus is catoptric.

The light is for the purpose of guiding vessels through Mississaga Straits, from either entrance thereof, as well as for the general purposes of navigation.

This light has been in operation since the 12th day of August last.

SAMBRO ISLAND SIGNALS.

It is announced that the only fog signals in use at the entrance of Halifax harbor are those made by guns stationed on Sambro Island.

In thick and foggy weather guns fired from on board vessels will be answered from Sambro Island by two guns fired in quick succession. The same reply will be made from Sambro to the sound of a steamer's whistle.

The Daboll fog trumpet formerly used at Sambro has been discontinued, and the light-ship lately stationed at the mouth of the harbor has been withdrawn.

FUNDY BAY—YARMOUTH HARBOR—LIGHT ON BUNKER'S ISLAND.

March.—A light has been established on the end of the reef off the southwest point of Bunker's Island, east side of entrance to Yarmouth Harbor.

The light is fixed red, elevated 27 feet above high water, and visible 10 miles.

The illuminating apparatus is catoptric.

This light is for the purpose of guiding vessels into Yarmouth Harbor, and will be seen from the southward between the bearings NE. by N. and N ¼ E. It can also be seen over Stanwood's Beach when bearing from S. ¼ E. to SE. ¼ E., but can not be run for between these bearings—the only entrance to the harbor being through Yarmouth Sound and around Cape East.

Position—Lat. 43 48 30 N., lon. 66 08 45 W.

Bearings Magnetic. Variation, 17 deg. westerly in 1874.

LOWER ST. LAWRENCE—ISLAND OF ORLEANS LIGHT.

May.—A light has been established at St. John, Island of Orleans, in the Lower St. Lawrence.

The light is revolving white, showing a flash every half minute. It is elevated 27 feet above high water, and in clear weather will be visible about 15 miles.

The illuminating apparatus is catoptric.

The tower is a square wooden building, 23 feet high, painted white, and stands on a wharf.

Position—Lat. 46 55 20 N., lon. 70 53 30 W.

KINCARDINE LIGHT, LAKE HURON.

A light-house has been erected on north pier at the entrance of Kincardine harbor, Lake Huron. The light is a fixed red light, elevated 37 feet above the level of the lake, and in clear weather should be seen at a distance of ten miles. A steam fog whistle has also been erected on the northwest head of Grand Menan.

NEW BRUNSWICK—MIRAMICHI RIVER LIGHTS.

A beacon lighthouse has been erected on the north side of Middle Island, in Miramichi River, New Brunswick.

The light is a fixed white light, elevated about 45 feet above high water, and will be shown from the light-house on the opening of navigation, and in clear weather should be seen from a distance of 7 miles.

The illuminating apparatus is catoptric.

The beacon is painted white.

Position—Lat. 47 03 30 N., lon. 65 27 W.

GULF OF ST. LAWRENCE—MAGDALEN ISLANDS LIGHTS.

June.—A light-house has been erected on the southeast side of Entry Island, one of the Magdalen Islands, in the Gulf of St. Lawrence.

A fixed red light was shown from it on the 20th of April last.

The light is 90 feet above the level of the sea, and in clear weather it will probably be seen at a distance of 12 miles from all points of the compass except E.SE. round to N., where it is intercepted by the high land of the island.

The illuminating apparatus is catoptric.

The tower is a square, wooden building, 28 feet high, with a dwelling attached, painted white

Position—Lat. 47 16 30 N., lon. 61 42 W.

MACQUERIE POINT—BAY OF CHALEURS.

August.—A light-house has been erected by the government of Canada on Macquerie Point, Bay of Chaleurs, Province of Quebec.

Lat. 48 12 30 N., lon. 64 46 12 W.

The light is a red and white revolving light, making a complete revolution in 2 minutes. It is elevated 56 feet above the level of the sea, and in clear weather should be seen from a distance of 12 miles.

The tower is a square building, 26 feet high and painted white.

The illuminating apparatus is catoptric.

ISLAND OF ST. PIERRE, MIQUELON—DOG ISLAND LIGHT.

On and after Aug. 1, 1874, a light will be exhibited on the SW. point of Dog Island, called Point Leconte, at a distance of 1,400 feet W. ¼ N. of the point designated on the chart as Point Plate.

This light is a fixed one, on an iron tower painted red, at an altitude of 60 feet above the sea level. It can be seen in clear weather 7 miles.

Its extent is circumscribed in a section of 163 degrees, presenting two burners. One white, of 40 degrees, will light the SE. pass so as to allow vessels keeping it in sight to avoid the Bataille Shoal on the right, and the rocks of Cape Noir and Bertrand on the left.

The second burner is red, and of 123 degrees. It should be avoided by vessels entering the SE. pass, and on leaving the white light, will guide them to the anchorage in the roads or harbor, by keeping the white light on Gun Point, and the red light in the interior of the town in line.

ST. LAWRENCE RIVER—ROCK NEAR BEAUJEU BANK.

Notice is given of the discovery of a small rock, Dunscomb rock, having 12 feet of water on it at low water spring tides, near Beaujeu bank, south of Crane Island, in the river St. Lawrence.

The rock has the following bearings:

Summit of Mount Tourmente, over the summit of Onion Island, bearing W. by N., and the north side of Wood Pillar touching the south side of Goose Island.

Bearings magnetic. Variation, 18 deg. westerly in 1874.

GULF OF ST. LAWRENCE—CAPE DESPAIR LIGHT.

September.—A light-house has been erected on Cape Despair, bay of Chaleur

The light is revolving, white, showing a flash at intervals of half a minute. It is 90 feet above high water, and in clear weather will probably be seen at a distance of 15 miles.

The illuminating apparatus is catoptric.

The tower is a square, wooden building, 18 feet high, painted red and white.

Position—Lat. 48 25 40 N., lon. 64 18 20 W.

SW. COAST—ST. MARY'S BAY—CHURCH POINT LIGHT.

A light has been established on Church Point on the east side of St. Mary's Bay.

The light is a fixed red light, elevated 36 feet above the level of high water, and in clear weather should be seen at a distance of 10 miles from all points of approach. The tower is a square wooden building, 20 feet high, painted white. The illuminating apparatus is catoptric.

The light is for the purpose of marking Church Point, and guarding against the dangers in its vicinity.

Position—Lat. 44 19 55 N., lon. 66 7 35 W.

ARGYLE HARBOR LIGHTS.

Notice is given that a light has been established on the south point of White Head Island, for the purpose of guiding vessels into Argyle harbor.

The light is a fixed red light, elevated 115 feet above the level of high water, and in clear weather should be seen at a distance of 12 miles from all points of approach. The tower is a square wooden building, 28 feet high, with dwelling attached, painted white. The illuminating apparatus is catoptric.

Position—Lat. 43 39 40 N., lon. 65 52 4 W.

ST. LAWRENCE RIVER—LITTLE METIS POINT LIGHT

November.—A light is shown from a light-house recently erected on Little Metis Point, St. Lawrence River, Province of Quebec.

The light is a revolving white light, showing a flash every minute, and making a complete revolution every two minutes. It is elevated 56 feet above the level of the sea, and in clear weather should be seen from a distance of 16 miles.

The illuminating apparatus is catoptric.

The tower is a square building, 40 feet high. painted white, with a red roof, and attached to the keeper's dwelling.

Position—Lat. 48 40 15 N., lon. 68 02 30 W.

BAY OF FUNDY—A FOG WHISTLE ON CAPE ENRAGE.

A steam fog whistle has been erected on Cape Enrage, Bay of Fundy, Province of New Brunswick.

It is situated 150 feet northeast of the light-house, and will be sounded during thick weather, fogs, and snow storms, 8 seconds in each minute, with intervals of 52 seconds between the blasts.

The whistle should be heard in calm weather, or with the wind, at a distance of 10 miles, and in stormy weather, or against the wind, from 3 to 5 miles, according to the state of the atmosphere.

China and Japan—Harbors and Coast Line.

CHINA.

HONG KONG HARBOR—SHOAL IN CAPSINGMOON PASSAGE.

January.—The Rear Admiral commanding the French naval forces in China, reports a shoal in Capsingmoon Passage.

This danger consists of a plateau, oval in form, about 32 feet in circumference. At low water spring tides there is barely one foot of water on the shoal, and it probably uncovers during the equinoctial spring tides. From the shoal—

Highest point of Green Island bears S. 46 E.

South end of Wonchuchow Island, S. 84 E.

SE. end of Lautao, distant 8 cables, S. 72 W

Victoria Peak, S. 56 E.

Shanghae Rock, in line with south point of Shanghae Island, N. 82 E.

East end of Cowechow Island, open to westward of Lamma Island, S. 15 E.

Bearings true. Variation, 20 deg. easterly in 1873.

NATUNAS ISLANDS—REEF IN THE NORTH CHANNEL.

On the 19th of March, 1873, at 6:15 P.M., the ship Louise and Margaret, passing through the North Natunas Channel, touched on an unknown reef. The ship at the time was drawing 14 feet 9 inches. Two minutes afterwards soundings were obtained in 11 fathoms water, with the following bearings:

The rocky islet lying 2½ miles S. of the SE. part of Poulo Leat, N.

The SW. point of Poulo Leat, N. 24 W.

These place the danger in lat. 4 34 40 N., lon. 107 59 39 E.

Bearings true. Variation, 1 25 easterly in 1873.

EAST COAST—YANG-TSE KIANG—NORTH BANK BUOY.

The North Bank Buoy has been shifted about five cables length SE. ½ S. of its former position. It is moored in 8 fathoms of water. After rounding the buoy, a straight course may be steered to the "Langshan Lightship."

Bearings magnetic. Variation, 2 deg. 10 min. westerly in 1874.

This notice affects the following charts, viz.: British Admiralty, Nos. 1480 and 2809.

FOOCHOW—MIN RIVER ENTRANCE.

July.—Three conical buoys have been placed at the entrance to Min River to mark the channel. They are 10 feet in diameter, painted in black and red horizontal stripes, and are surmounted by black cages elevated 18 feet above the water.

No. 1, or outer buoy, is moored in 8 fathoms of water, and from it Sharp Peak bears N. 85¼ deg. W.; Rees Rock S. 54¾ deg. W.

No. 2, or middle buoy, is in 4 fathoms of water, with Sharp Peak bearing N. 69½ deg. W.; Rees Rock S. 39¾ deg. W.

No. 3, or inner buoy, is moored in 7½ fathoms of water, with Sharp Point bearing N. 46¾ deg. W., and Round Island S. 54¼ deg. W.

Bearings magnetic. Variation, 45 deg. westerly in 1874.

SULU OR MINDORO SEA—PALAWAN SHOALS.

Three shoals are reported to exist off the SE. coast of Palawan.

From the centre of the first shoal, Dougal Point bears N. 69 W., and Sir James Brooke Point N. 19 30 W. It is about a mile in extent, the greatest depth of water being 13 fathoms and the least 8¼ fathoms.

From the centre of the second shoal Dougal Point bears W., and Philanthropy Point N. 6 30 W. It is about 1¼ miles in extent, the general depth of water over it varying from 8 to 14 fathoms, the least depth being 7 fathoms.

The third shoal extends about a mile. The general depth varies from 11 to 14 fathoms, the least water found being 9 fathoms.

From its centre Philanthropy Point bears N. 60 W., and Sir James Brooke Point S. 88 W.

These shoal lie between lats. 8. 37 N. and 8 46 N., and lon. 117 50 E. and 118 E.

Bearings true. Variation, 1 deg. easterly in 1874.

COAST OF TONQUIN—REPORTED DANGER.

September.—A rock, which uncovers at low water, has been reported on the coast of Tonquin. Its position is given as in lat. 17 32 30 N., lon. 106 36 39 E.

LUZON ISLAND—MANILA BAY.

Notice is given that a new harbor light has been established at the mouth of the Pasig River. It is in the battery on the southern mole; fixed green, elevated 16 feet above high water, and is visible from the mouth of the river one mile, between the bearings NW. and SE. The lantern, painted dark red, is supported on an iron stand.

Position of the light—Lat. 14 36 20 N., lon. 120 57 20 E.

The illuminating apparatus is dioptric.

EAST COAST—SHANTUNG PROMONTORY LIGHT.

November.—The erection of a light-househas been commenced on the Shantung Promontory, from which, when completed, a light will be exhibited.

The light will be a fixed light, showing white to seaward and red inshore to the southward and westward (the latter to warn vessels when they approach the coast). It will be elevated 200 feet above the sea, and in clear weather the white light should be seen from a distance of 21 miles.

The illuminating apparatus will be dioptric or by lenses of the first order.

The tower will be round, 64 feet high, and built of stone. Position—Lat. 37 24 N., lon. 122 42 E.

TEMPORARY LIGHT.

A temporary fixed white light of the sixth order is now exhibited near the above light-house, visible between the bearings N.NE. ¾ E., round by west and south to S.SE. ½ E.

The light is, from some positions, obscured by a point of the mainland and Alceste Island, between S. by E. ¾ E., and S.S.E. ½ E.

It is elevated 160 feet above the sea, and in clear weather should be seen from a distance of 8 miles.

All bearings are magnetic. Variation, 4 deg. westerly in 1874.

JAPAN.

KIN-SIN—EAST COAST—REPORTED POSITION OF NELLY ROCK.

May.—The commander of the Peninsula and Oriental Steamship Company's steamship Avoca reports having seen the danger known as the Nelly Rock, the position of which has heretofore been considered doubtful.

The following bearings were taken from the vessel at the time the rock was seen breaking:—Cape Cochrane (Kayeta saki) N.NW. ½ W., and Utoyama, SW. ¾ S. From these bearings and that taken of the breakers, the position of the rock is given as lat. 31 48 N., lon. 131 35 E., or E. by N. about three miles from Cape Cochrane.

Bearings magnetic. Variation, 3½ degrees W. in 1874.

NIPON—SURUGA GULF—OMAESAKI LIGHT.

June.—A light has been established at Omaesaki, on the most southerly point of the Province of Totomi, to the Westward of Saruga Gulf.

The light is a revolving white light, showing a bright flash once every half minute, elevated 173 feet above the sea and visible 20 miles.

The illuminating apparatus is dioptric, of the first order.

The light will illuminate an arc of 242 deg. 19 sec., between the bearings SW. and E.SE. ½ E.

The light-house is a circular brick tower, 57 feet high, painted white.

Position—Lat. 34 36 N., lon. 138 15 E.

NOTE.—"Lady Inglis Rock" bears from the light-house E. ¾ S., distant 3 miles.

Bearings magnetic. Variation, 3 deg. 46 min. westerly in 1874.

France—Harbors, Coasts, etc.

WEST COAST—FINISTERE—LE FOUR ROCK LIGHTS.

January.—The French government has given notice that from the 15th March, 1874, a light will be exhibited from a light-house on Le Four Rock, north entrance of Chenal du Four.

The light is a fixed and flashing white light, to show a fixed light during 30 seconds, and flashing light of eight distinct flashes, followed by eclipses, during 30 seconds; thus the light will be alternately fixed and flashing every half minute. It is elevated 92 feet above the level of high water, and in clear weather should be seen from a distance of 15 miles.

The illuminating apparatus is dioptric or by lenses, of the third order.

The light-house is 22 feet high and is built of stone. Position—Lat. 48 31 20 N., lon. 4 47 30 W.

A steam fog trumpet will be attached to the light-house, but the intervals of blasts has not yet been decided on.

ALTERATION IN LIGHTS AT MARSEILLES.

Also, that from March 1, 1874, the six green lights which, two by two, mark the entrance of the new basins of the port of Marseilles, will be replaced by red lights.

FIXED LIGHT AT PORT CROISIC.

February.—A light is exhibited from a tower recently erected from the outer extremity of the Jetty of Trehic, at the entrance of Port Croisic.

The light is a fixed light, showing white between the bearings S.SE. (easterly) and E SE. On either side of these bearings the light will show red until obscured by the land.

The light will be elevated 39 feet above high water, and in clear weather the white light should be seen from a distance of ten miles.

The illuminating apparatus is dioptric or by lenses of the fifth order.

The tower is 33 feet high, and built of stone. Position—Lat. 47 16 30 N., lon. 2 31 30 W.

All bearings are magnetic. Variation, 19¼ deg. westerly in 1874.

Great Britain—Sea-coast and Harbors.

WRECK IN THE GULL STREAM.

January.—Notice is given that a green buoy, marked with the word "Wreck," has been placed about 40 yards NW. of a vessel sunk in the Gull Stream.

The buoy lies in 7 fathoms at low water spring tides with the following compass bearings:—

St. George's Church, Ramsgate, in line with Albion House, N.N W. ¼ W.
Gull light vessel, SW. ½ W.
NW. Goodwin buoy, S. ½ W.

CODLING BANK LIGHT VESSEL.

The Codling Bank light vessel has been moved S. by W. one mile, and is moored in 9 fathoms at low water spring tides.

From the light vessel the Kish light vessel will bear N. (westerly), distant 16¼ miles; North Arklow light vessel. SW. ¼ S., distant 11¾ miles; Wicklow Head, W. by S. (soutnerly), distant 10¼ miles.

All bearings are magnetic. Variation 23 deg. westerly in 1873.

DANGER SIGNAL ESTABLISHED ON LIGHT VESSELS

The following danger signal has been established on board each of the light vessels on the coast of Ireland:—

When a vessel is observed standing into danger, a gun will be fired, and repeated until observed by the vessel; and the two signal flags J. D., of the commercial code, "You are standing into danger," will be hoisted and kept flying until answered.

GOODWIN SANDS—EAST GOODWIN AND SOUTH SAND HEAD LIGHT VESSELS.

A new light vessel, called the East Goodwin, has been placed on the east side of the Goodwin Sands; the South Sand head light vessel has been moved 9-10ths of a mile to the southward; a new can buoy, called the SW. Goodwin, and painted black, has been placed midway between the "South Sand Head light vessel" and the "Burnt Head buoy." and the star and globe have been removed from the "SE. Goodwin buoy."

The East Goodwin light vessel has her name painted on her side in large letters, and carries a beacon, diamond shaped at her masthead. She shows, at an elevation of 38 feet above the level of the sea, a green revolving light, at intervals of 15 seconds, and in foggy weather a gong will be sounded. The vessel lies in 30 fathoms at low water spring tides, with the following compass bearings:—

South Sand Head light vessel, W. by S. ½ S., distant 6 6-10ths miles.

South Goodwin buoy, W. by S. ¼ S., distant 3 7-10ths miles.

Goodwin beacon, N.NW. ¼ W., distant 2 2-10ths miles.

SE. Goodwin buoy, W.NW., distant 1 1-10th mile.

East Goodwin buoy, N. ¾ E., distant 2 5-10ths miles.

North Sand Head light vessel, N. by E. ½ E., distant 6 5-10ths miles.

The South Sand Head light vessel (the distinctive character of which is unaltered) now lies in 14 fathoms at low water spring tides, with the following marks and compass bearings:—

South Foreland lights in line, W. by. N.

Ripple Mill in line with the south side of Old Stairs' Bay, NW. by N.

South Foreland low light-house, W. by N., distant 3 3-10ths miles.

Deal Bank buoy, N. ½ E., distant 4 7-10ths miles.

S. W. Goodwin buoy, N.NE. ¾ E., distant 2 3-10ths miles.

South Goodwin buoy, E. by N. ¾ N., distant 2 9-10ths miles.

East Goodwin light vessel, E. by N. ¼ N., distant 6 6-10ths miles.

NE. Varne buoy, SW. ½ S., distant 9 miles.

Varne light vessel, SW. ¼ W., distant 14 5-10ths miles.

The SW. Goodwin buoy, a black can, lies in 13 fathoms at low water spring tides, with the following marks and compass bearings:—

East end of Admiralty Pier at Dover just open of South Foreland, W. by S. ¼ S.

Ringwold church just open north of Kingdown church, W. by N. ¾ N.

South Sand Head light vessel, S.SW. ¾ W., distant 2 3-10ths miles.

Deal Bank buoy, N. by W. ¼ W., distant 3 miles.

Bunt Head buoy, N. by E., distant 2 4-10ths miles.

THE LOWESTOFT HIGH LIGHT.

February.—A first order revolving bright light, showing a flash at intervals of 30 seconds, is exhibited at Lowestoft high light-house, instead of the old fixed light. The light is at an elevation of 123 feet, and will show, from the light-house, between N. 15 deg. E., round S to S. 9 deg. W.

The red fixed light will be shown as heretofore 24 feet below the high light, between the bearings from the light-house of N. 39 deg. E., and N. 53 deg. E.

DAUNT'S ROCK LIGHT VESSEL, CORK.

March.—A light-vessel has been moored eight-tenths of a mile S. by E. of Daunt's Rock, in 14 fathoms of low water spring tides, and 1 4-10ths miles S.SE from Robert's Head, County of Cork, with the following marks and bearings:—

Roche's Point Light, entrance to Queenstown harbor, NE. ¾ N. 4 8-10ths miles.

Poor Head, E. by N. ¾ N. 5 8-10ths miles.

Ballycotton Light, E. ½ N. 13 miles.

Telegraph Tower, N. by W. ¾ W. 1 9-10ths miles.

Barry Head, W. by N. 4 miles.

Kinsale Head, W. by S. 11 3-10ths miles.

A red fixed light is exhibited at the mainmast head, at an elevation of 39 feet above the sea.

A gun will be fired during foggy weather twice, with an interval of five minutes, every quarter of an hour.

HOLYHEAD FOG SIGNALS.

Notice is hereby given that the North Stack signal gun, near Holyhead, which has hitherto been fired in foggy weather once every half-hour, except when the mail packets were approaching, and then every quarter of an hour, will be discharged throughout the continuance of the fog once in every 15 minutes.

ENTRANCE TO THAMES—PRINCE'S CHANNEL.

Notice is given that a spit having extended to the southward from the Girdler Sand, between the Girdler Beacon and the Prince's Channel light vessel, a black can buoy, marked SE. Girdler, has been placed in 3¼ fathoms low water spring tides, with the Prince's Channel light vessel bearing E by S. ½ S., five cables distant, and the Girdler Beacon NW., also five cables distant.

The buoy lies a little to the southward of the line from the South Girdler buoy to the Prince's Channel light vessel.

ALTERATION OF BALBRIGGAN LIGHT.

April.—The Commissioners of Irish Lights give notice that they have caused a red sector of light to be shown from the lantern of Balbriggan light-house, between the bearings NW. by N. ½ N., round W. to NW., which clears the Skerries to the northward.

BRISTOL CHANNEL—WRECK NEAR TENBY.

A green buoy, marked "Wreck," has been placed 15 fathoms E SE. from the brig Henry M. Hine, sunk near Tenby.

The buoy lies in 2 fathoms at low water spring tides, with the following marks and compass bearings:—

Tenby church tower, twice its width open north of the fort on St. Catherine's Island, NW. by W. ¼ W.

North Highcliff buoy, S.SW. ¼ W., distant nine-tenths of a mile.

The bulwarks of the sunken vessel uncover at low water, and the masts are standing.

ANTOINETTA ROCK.

Captain Stepanovich, of the Austrian bark Antoinetta, reports seeing a rock in lat. 25 34 30 N., lon. 41 23 W. of Greenwich, appearing about 25 feet above the water. The rock is not laid down on any charts. It was of a reddish gray color and the water was discolored for one-eighth of a mile all around, the sea breaking very heavily at its base. The captain named it the "Antoinetta Rock."

BRISTOL CHANNEL, HARTLAND POINT LIGHT.

May.—A revolving light, showing at intervals of thirty seconds white and red flashes in the order of two white and one red.

Elevated 120 feet above high water mark.

This affects the following charts, etc, viz.:—British Admiralty, Nos. 1, 2, 1178, 1179, 1598, 2059 and 2060 a; U. S. Hydrographic Office, Nos. 279 and 317; and U. S. Light-list No. 4.

LIGHT-VESSELS—SAFETY SIGNALS.

June.—Notice is hereby given that in order the better to determine the direction in which lightships are riding, a white riding light will be exhibited from sunset to sunrise from the forestay of each vessel at a height of six feet above the rail.

The attention of shipmasters is also directed to existing regulations to the following effect, viz.:—

That if a light-vessel has been driven from her proper position to one where she is of no use as a guide to shipping, the usual lights will be discontinued, a fixed red light at each end of the vessel substituted, and a red flare shown every quarter of an hour; and that the balls also, or other masthead marks which help to distinguish the light-vessel by day, will in similar manner be struck. If from any cause the light-vessel be unable to exhibit her usual lights while at her station she will show only the riding light on the forestay. The firing of special rockets of an explosive character will signify the need for assistance from the shore.

Trinity House, London, 1874.

CHANNEL ISLANDS—JERSEY—FIXED LIGHT ON LA CORBIERE ROCK.

A light-house has recently been erected on La Corbiere Rock, at the southwest point of the Island of Jersey. From seaward, between the bearings of S. by E. through east, to N. by W., the light is a fixed white light. In-shore of the eastern limits of the white light two sectors of red light will be exhibited—one to the northeastward, for marking the shoal ground of the Rigdon Bank and thence to the land; the other to the southeastward, for marking Les Vracheres and the adjacent dangers between it and the shore.

The light is elevated 119 feet above the level of high water spring tides and in clear weather the white light should be seen from a distance of 17 miles.

The illuminating apparatus is dioptric (or by lenses) of the second order.

The light house is 62 feet high, and is situated on La Corbiere Rock.

During fogs a bell will be sounded three times in quick succession at intervals of thirty seconds.

Position of the light-house—Lat. 49 10 40 N., lon. 2 14 50 W.

Bearings magnetic. Variation, 19 45 westerly in 1874.

ENTRANCE TO LOUGH CARLINGFORD.

A sunken pinnacle rock, having 8 feet of water on it at low water spring tides, and 20 feet of water close to, lies about 60 yards SW. by S. from Frazer Rock. The red buoy, with staff, which has heretofore marked the Frazer Rock, has been moved about 60 yards in a southwesterly direction, and now lies immediately to the southwest of the pinnacle rock.

The bearings from the rock are as follows:—

Greenore Pier light, NW. ¾ W.

Earl Rock Perch, N. ½ W.

North angle of Greencastle, E. ¾ N.

Bearings magnetic. Variation, 23 30 westerly in 1874.

HEWETT CHANNEL.

August.—Hewett Channel has decreased in breadth to about 200 yards, with a depth of 24 feet.

A channel, about 600 yards wide, has opened out in a north and south direction through the NE. end of the Corton sand. This channel, being better adapted for navigation than Hewett channel, will be buoyed, and, together with an alteration in the position of the St. Nicholas and Corton light vessels, the general buoyage of the locality will be carried into effect about the middle of July.

A shoal of 23 feet having been formed to the northward of the Cockle light vessel, a can buoy, painted in black and white rings, will be laid to mark its northern edge.

Mediterranean and Adriatic Seas and Coast Line.

BREAKWATER IN GULF OF SPEZZIA.

January.—Two light vessels will mark the extreme ends of the Breakwater. The west light vessel will be placed 400 yards from the most projecting point of Santa Maria, and will exhibit two vertical lights, the upper red and the lower green. The east light vessel will be placed 300 yards from Santa Theresa Point, and will also exhibit two vertical lights, the upper green and the lower red, During the day these vessels will carry a red flag at the masthead.

Corresponding with these floating colored lights two fixed white lights will be exhibited on the adjacent shores, one upon Santa Maria Fort, 95 feet above the sea, and the other on Santa Theresa Point, 82 feet above the sea.

Note.—The ship channels will be between the Floating Breakwater lights and the corresponding white lights on the shore. It is dangerous to pass between the two floating lights.

SANTANDER—PLACING OF BUOYS ON BERGANTIN BANK.

To mark Bergantin Bank, in the Port of Santander, there have been placed, in six feet water, three conical buoys, painted bright red. The first buoy marks the eastern extremity of the bank, with Atalaya bearing NW. ½ N., and the Castle of San Martin, E.NE; the second buoy, placed 280 yards from the first, marks the middle of the bank, with Atalaya bearing N.NW. ¼ W., and the Castle of San Martin, E.NE. ¼ E; the third, marking the western extremity of the bank, and placed 280 yards from the middle buoy, has Atalaya bearing from it N. by W. and the light-house of La Cerda, E.NE. ¼ E. Bearings true. Variation, 19 32 W. in 1873.

HARBOR LIGHT AT CARLOPAGO.

A light has been established at the extremity of the new mole at Carlopago.

The light is fixed white, elevated 16 feet above the level of the sea, and is visible 6 miles. During the Bora the light can not be exhibited.

Position—Lat. 44 31 30 N., lon. 54 30 E.

LIGHT AT ROGOSNIZZA.

A light has been established on the island of Mulo, at the entrance to the port of Rogosnizza, Dalmatia.

The light is fixed white, elevated 77 feet above the sea, and is visible 13 miles.

The illuminating apparatus is dioptric or by lenses, of the fourth order.

The tower is attached to the keeper's dwelling, painted white.

Position—Lat. 43 31 N., lon. 15 55 E.

PORT SAID LIGHTS

February.—The Egyptian government has given notice that from the 5th of January, 1874, the following alteration will be made in the breakwater lights at Port Said.

The fixed red and green lights which now indicate the extremes of the breakwaters, will be replaced by floating lights of the same color.

The entrance and the channel between the breakwaters to Port Said will be marked by two lines of floating lights, red lights on the western side and green lights on the eastern side. The line of red lights commences at the extremity of the western breakwater, now in course of extension, and the green lights from a floating light placed N.NE. ⅔ E., distant 7-10ths of a mile from the end of the eastern breakwater.

Note.—Vessels entering Port Said should steer for the directing light on Lake Menzaleh, as heretofore, keeping the red lights on the starboard hand, and the green lights on the port hand.

All bearings are magnetic. Variation, 4½ deg. westerly in 1874.

CATANIA HARBOR.

In order to show the position of the breakwater now building off the harbor of Catania, two black spar buoys have been temporarily placed.

The northern one is in 9 fathoms, with the red light on the mole bearing W.SW. ⅛ W., distant 590 yards, and the Sciarra Biscari light-house SW. by W. ¼ W., distant 1072 yards.

The southern buoy is in 9¼ fathoms, with the light-house on the mole bearing N W. ½ N., distant 711 yards, and the Sciarra Biscari light-house W. NW. ¾ W., distant 886 yards.

Vessels bound to Catania should not attempt to pass between the buoys or between the northern buoy and the coast.

All bearings are magnetic. Variation, 11 11 westerly in 1873.

BLACK SEA—ALTERATIONS IN LIGHTS—ODESSA.

March.—The two red vertical lights exhibited at the end of the Quarantine Mole, Odessa, have been discontinued, and instead thereof a light-vessel placed near the end of the Mole (now in course of construction) for the winter season.

The light-vessel exhibits a fixed white light, elevated 40 feet above the level of the sea, and in clear weather should be seen from a distance of seven miles.

The vessel is built of iron, painted black, and has two masts, each surmounted with a perforated globe, painted blue

In foggy weather a bell will be rung for ten minutes at intervals of five minutes.

Note.—In case of ice, or the freezing over of the roads, the light-vessel will be removed, and replaced when the danger from ice is past.

MEDITERRANEAN—ADRIATIC—MALTEMPO CANALE—RED HARBOR LIGHT AT CZIRQUENIZZA

April.—The Austrian government has given notice that from the first of March, 1874, a light would be exhibited at the extremity of the Southern Mole of the port of Czirquenizza, Maltempo Canale.

The light is a fixed red light, elevated 3 feet above the sea, and should be seen from a distance of about three miles.

Position—Lat. 45 10 10 N., lon. 14 41 30 E.

PORT OF SOCOA.

May.—Advices from Bayonne warn masters of the dangers of the port of Socoa, when a vessel can not be hauled into the port she is always in danger while in the roads.

CARNERO POINT LIGHT—GIBRALTAR BAY.

The light is fixed green, elevated 137 feet above the level of the sea, and in clear weather will be visible about 11 miles, between the bearings N. E. by E. ⅓ E. and S. ¼ W., over an arc of 235 deg. 50 min.

The illuminating apparatus will be dioptric, of the fifth order. The tower is round, 50 feet in height, painted yellow, and is attached to the keeper's dwelling. The lantern is painted green, and is surmounted by a spherical dome.

Position—Lat. 36 04 30 N., lon. 5 25 45 W.

Bearings magnetic. Variation, 19 deg. 36 min. W. in 1874.

VINCENZO LIGHT—NAPLES.

September.—The light is red, with flashes every 3 minutes, and illuminates the whole sector of the surrounding sea. In the interior of the port the light exhibited is white. The height of the flame above the level of the sea is 15 m. and is visible in clear atmosphere at a distance of 12 miles. The illuminating apparatus is dioptrical and lenticular of the sixth order. The lights of the two dioptrical light-houses, which were substituted provisionally for the destroyed light-houses, have ceased.

BEACONS IN THE GULF OF JOUAN.

Notice is given that a beacon has been erected on the largest rock above water of Fourmigue Reef, in the Gulf of Jouan. It is 38 feet above low water mark, is painted red, and surmounted by a wicker-work ball, the top of the latter being 47 feet above the same level.

A beacon buoy has also been placed on Basse Orientale of the Basse de la Fourmigue. The buoy is painted black, and is in 16 to 20 feet of water.

A NEW LIGHT AT PATTI.

Notice has been received of the establishment of a new light on the western shore of Patti Bay, to serve as a leading mark for the anchorage.

The light is fixed red, 16¾ feet above the level of the sea, and should be seen for about four miles in clear weather all around the horizon. Illuminating apparatus catoptric. The lantern is supported by a column of masonry of white color, 10¼ feet high, and distant 65 yards from the shore

Position given as lat. 38 09 N., lon. 14 57 15 E.

VALENCIA LIGHT.

The entrance to the inner harbor at Valencia is now marked by two green lights on the mole heads. They are seen only after passing the great breakwater.

SALONIKA BAY —SHOAL OFF CAPE KARA.

October.—The shoal bank off cape Kara, Vespasian shoal, has been examined by H. B. M. Cruiser, and was found to be 40 feet long and 15 feet in readth in a north and south direction. It has 14 feet of water on it, with from 20 to 24 feet outside, and 17 feet between the shoal and the shore. The bank is composed of sand and loose stones.

From the shoal Cape Kara light-house bears NE. ½ E., distant about 6 cables, and Touzla Point S. ¼ E.

Vessels entering or leaving Salonika Bay should not round Cape Kara, or approach the coast between that cape and Touzla Point within one mile, or stand into less than 10 fathoms of water.

Bearings magnetic. Variation, 8 deg. westerly in 1874.

ALGERIA—GULF OF COLLO—LIGHTS AT PHILIPPEVILLE.

Two leading lights have been established near Philippeville, in the Gulf of Collo. The lights are fixed red, on beacons, recently built—one on point Chateau Vert, and the other on the north slope of Skikda hill.

The light on Chateau Vert, in a rectangular beacon tower, is near the road from Stora to Biskra, and with a clear atmosphere should be seen a distance of 7 miles. The vane of the light is 8 feet above the ground, and above water 126 feet. The illuminating apparatus is catoptric.

Position of the light—Lat. 36 53 7 N., lon. 6 55 35 E.

CHANGE IN LIGHT ON CAPE PASSERO.

The light on Cape Passero, east coast of Sicily, has been changed to an intermittent light, showing white during three minutes, followed by an eclipse of one minute, then a red flash, followed by an eclipse of one minute.

The light is elevated 129 feet above sea level, and in clear weather should be visible 12 miles.

NEW LIGHT ON PUNTA D'OSTRO.

November —A light is exhibited from the light-house recently erected on the summit of Punta d'Ostro, Gulf of Cattaro, to replace the old light-house, which will be destroyed.

The light is fixed white, with a flash every half minute. It is elevated 263 feet above the level of the sea, and in clear weather should be visible for over 20 miles.

The illuminating apparatus is dioptric and of the third order.

The tower adjoining the keeper's dwelling is of two stories, decagonal in shape, 55 feet high, and is painted white with green blinds.

Position—Lat. 42 23 28 N , lon. 18 32 E.

North Sea, Coasts, etc.

ELBE RIVER.

January.—Notice has been received of the completion of the lights at Altenbruck and Brunsbuttel.

The light at Altenbruck will show up the Elbe to the black buoys LL , M., N., and O., and down the river, clear of Grodener Sand, and the "Alten Liebe," at Cuxhaven.

The light at Brunsbuttel will show up the Elbe over the entire width of channel, and down the stream to the buoys 19, 18, and 17.

WEST SCHELDE.

The Minister of Marine of the Netherlands has given notice that there have been established two new leading lights near Kaapduinen, in the East Gat of the West Schelde.

The lights bear from each other N. 2 W. and S. 2 E., distant apart about 219 yards. They are fixed white.

The illuminating apparatus is catoptric.

The northern light is 92 feet and the southern 29½ feet above ordinary high tide. They illuminate an arc of 180 degrees, from S. 88 W. by the south, to N. 88 E. In clear weather they will be visible 6 miles.

Vessels entering the river must, after passing Kaapduinen, leave the range of the leading lights of Westkapelle and Zoutelande, and take up the range of the new lights, until the high light of Flushing changes from red to white, at which time the point of the Nolleplaat will have been passed, and they may then steer for the Roads.

Bearings magnetic. Variation, 18 deg. W.

FIXED LIGHT AT ULLA.

February.—The Norwegian government has given notice that from the 25th of January, 1874, a light will be exhibited at the fishing station at Ulla.

The light is a fixed white light, visible from SW. by W., round seaward and in towards Ulla sound; it is elevated 65 feet above the sea, and in clear weather should be seen from a distance of 8 miles.

The illuminating apparatus is of the sixth order.

The light is on Kværnholm. Position—Lat. 62 41 30 N., lon 6 10 48 E.

The light will be exhibited annually from 25th January to the 8th of April.

NOTE.—This light, although chiefly exhibited for the use of fishermen, will also be useful to vessels bound for Christiansund and Trondheim.

All bearings are magnetic. Variation, 18½ deg. westerly in 1874.

FOG BELLS IN CHRISTIANIA FIORD.

March.—The Norwegian government has given notice that fog bells have been established in the light-houses of Hæghelm, Steilene, Digerhoveded, and Filtvedt, in Christiania Fiord.

In thick or foggy weather the bells will be sounded nine times in quick succession every five minutes.

BALTIC SEA—GERMAN COAST—SAILING DIRECTIONS FOR THE HARBOR OF SWINEMUNDE.

Two new beacons having been erected on the western mole of the harbor of Swinemunde, the following sailing directions are published to take the place of those issued in 1871:

The harbor is readily recognized by the light-house, rising 226 feet above the level of the sea, and lies at the bottom of a shallow bay, the limits of which are marked by high shores; to the eastward by Swinehoff, to the westward by the Strekelberg.

ODER BANK.

Nearly off the middle of the bay, about 13 miles northeast of the harbor, lies the Oder Bank, extending 15 miles in a N.NE. and S.SW. direction, from 2½ to 10 miles in width, and having in places only 17 to 19 feet. It is marked at the southern end by a red beacon buoy, 23 feet in height, surmounted by two black balls.

The Oder Bank creates, for vessels of ordinary draught, two channels—an eastern and a western Vessels drawing less than ten feet may cross the bank without danger, but heavy gales from the northward and the eastward frequently raise heavy seas, which should cause it to be avoided.

GULF OF FINLAND—NEW BEACON ON LAVENSARI ISLAND.

September.—A new beacon has been erected on

Lavensari Island, in place of the wooden one destroyed in the fall of last year.

It is of the same height as the old one, and has the form of an octagonal truncated pyramid.

The NE. and NW. sides are painted white, and the SE. and SW. sides red, and the roof black.

GULF OF BOTHNIA—NEW LIGHTS.

On Storö Island, one of the Svenska Hogar group, at the entrance to Stockholm. This light will show pale red flashes with short eclipses between. The new light-house will be of iron, and near the present one, the latter being removed on the completion of the former.

The illuminating apparatus is dioptric.

Position of the light—Lat. 59 26 40 N., lon 19 30 30 E.

On Furo Island, at the northern entrance to Kalmar Sound, a signal light will be displayed from the pilot's lookout, showing their position, and leading to the port of Oscarshaum.

Near Ratan, in the Gulf of Bothnia, and showing the southern entrance to that port, a small leading light. A fog bell will also be placed here.

Approximate position of the light—Lat. 63 59 N., lon. 20 56 E.

NORDERNEY ISLAND LIGHT.

October.—A new light will be shown from a tower recently erected on the island of Norderney. It will be a white flash light with intervals of six seconds. The light will be elevated 195 feet above the level of the sea, and should be seen a distance of 20 miles.

The illuminating apparatus is dioptric and of the first order.

Position of the light—Lat. 53 42 40 N., lon. 7 13 44 E.

BALTIC SEA—LIGHT AT NIDDEN.

November.—A light is exhibited from a light-house recently erected near the village of Nidden, on the Curische Nehrung.

The light is flashing white, with intervals of 10 seconds between the flashes. It is elevated 223 feet above the level of the sea, and in clear weather should be visible 22 miles.

The illuminating apparatus will be dioptric, of the first order.

The tower is octagonal, 75 feet in height.

Position—Lat. 55 18 24 N., lon. 21 E.

Note.—The limit of visibility of this light intersects those of the Memel and Brusterort lights—the former at a distance of 14 miles from the coast, and the latter at a distance of 12 miles.

COAST OF JUTLAND—SIGNAL STATION AT HANSTHOLM.

A signal station has been established in connection with the telegraph station at Hanstholm.

It is 320 feet N.NW. from the light-house. Messages will be received and delivered from sunrise until sunset. The telegraph station will be opened during the day time.

The signals will be those of the International Code; but Danish vessels which have not yet obtained that code may use the ordinary signals.

Vessels showing their numbers will have their names telegraphed gratis to the Exchange of Copenhagen at noon.

The messages will be sent in the Danish language and letters.

The charge for a message of 20 words will be 2 francs, and 1 franc for each additional 10 words for all messages between vessels and the signal station. Telegraphing will be charged at the same rate.

Pacific and Indian Seas and Coast Lines.

EAST INDIA ARCHIPELAGO—REEF SOUTH OF GILLOLO PASSAGE.

January.—The master of the ship Talbot reports that his vessel grounded on and passed over a reef immediately south of Gillolo Passage, in lat. 151 30 S. lon. 128 8 E. with east side of the Grasses bearing N.NE. and high peak of Gomona W.NW. The latest charts mark no bottom at 70 fathoms at this place. The sea was nearly smooth, and ship sailing from 5 to 6 knots per hour, steering S.SW. The ship grated over for about three times her length, so that the extent of the shoal S.SW. and N. NE. is about 500 feet. Before a cast of the lead could be obtained the ship was in deep water. This shoal lies directly in the fairway between Manipa Straits and the entrance to Gillolo Passage. The bottom must be of dark-colored rock, as there was not the slightest discoloration of water, or any appearance whatever to indicate danger. Time of accident 3:30 P. M. Tide half ebb.

WANGARI CAPE.

March.—A dangerous rock, 33 yards in diameter, has been discovered off Cape Wangari.

It has only 16 feet of water over it at low water, and the sea only breaks on it in bad weather.

It is situated three-quarters of a mile from Bream Island, with the following bearings:—Cape Bream, S. by W. ¼ W.; Cape Tutukaka, N. ½ E.; Sail Rock SE. ½ S., and the middle of Bream Island, SW. by W.

SOUNDINGS NEAR POINT DE GALLE.

Information has been received of the existence of a bank of soundings, varying from 20 to 31 fathoms, at distances of from 15 to 30 miles southward of the south point of Ceylon and seaward of the bank skirting the coast heretofore considered to be the outer edge of soundings.

The western edge of this bank is 23 miles to the southeastward of Point de Galle. From that position, soundings with a bottom of fine sand and rock, extend 30 miles in a continuous line, or between lat. 5 40 N. and lon. 80 25 E. and lat. 5 35 N. and lon. 80 58 E.

PHILLIPPINE ISLANDS—MINDANAO.

Information has been received that a shoal exists about two miles to the eastward of the Island Tumalutan.

It is formed of rock and sand, is about one-half mile in extent, and has from 6½ to 9 fathoms of water over it. In its centre are four rocks having only 2¼ fathoms of water.

Bearings—Summit of the Island Tumalutan S. 73 deg. W.; the Island Sibago S.

Approximate position—Lat. 7 N., lon. 122 23 E.

Another shoal is said to exist seven miles to the eastward of Tumalutan Island, but no definite information has been received as to its position.

SEARCH FOR DECKER ISLAND.

The following information is taken from the report of Commander G. E. Belknap, U. S. N., commanding U. S. S. Tuscarora:—

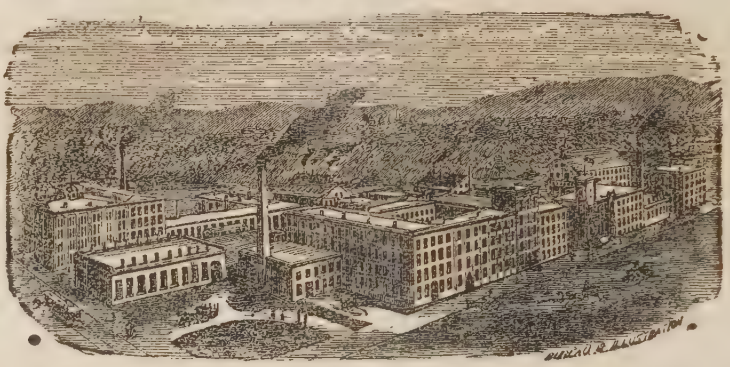
The ship stopped to sound in lat. 23 17 N., lon. 162 58 E., a position about 5 miles S. ½ W. from the assigned locality of Decker Island, noticed on the U. S. Hydrographic Office Chart No. 10 as doubtful.

The weather was fine, sky clear, and no sign of land could be seen in any direction from the topmasthead.

The depth found was 2,870 fathoms, yellow-brown muddy bottom, and the entire absence of birds strengthened the opinion that no land exists anywhere in that vicinity.

THE REMINGTON WORKS,

ILION, N. Y.

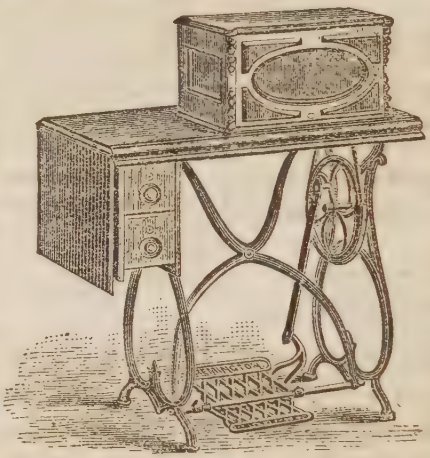


REMINGTON

SEWING MACHINES, FIRE ARMS, AGRICULTURAL IMPLEMENTS.

THE REMINGTON SEWING MACHINE has sprung rapidly into favor as possessing the best COMBINATION of good qualities, namely: Light running, smooth, noiseless, rapid, durable, with perfect Lock Stitch.

It is a Shuttle Machine, with Automatic Drop Feed, Design beautiful, and construction the very best.

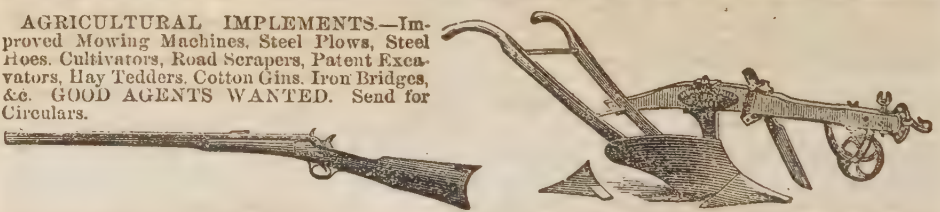


REMINGTON No. 1 Machine for family use, in the *third year of its existence*, has met with a more *rapid increase of ratio of sales than any machine on the market.*

REMINGTON No. 2 Machine for *manufacturing* and family use (ready for delivery only since June, 1874), for range, perfection, and variety of work, is without a rival in family or *workshop.*

The highest order of Medal was awarded the REMINGTON at the late Vienna Exposition.

AGRICULTURAL IMPLEMENTS.—Improved Mowing Machines, Steel Plows, Steel Hoes, Cultivators, Road Scrapers, Patent Excavators, Hay Tedders, Cotton Gins, Iron Bridges, &c. GOOD AGENTS WANTED. Send for Circulars.



The REMINGTON WORKS also manufacture the new Double-Barreled Breach-Loading Shot-Gun, snap and positive action, with *patent joint check*, a marvel of beauty, finish, and cheapness, and the CELEBRATED REMINGTON RIFLES, adopted by NINE different GOVERNMENTS, and renowned throughout the world for Military, Hunting, and Target purposes; all kinds of Pistols, Rifle Canes, Metallic Cartridges, &c.

The REMINGTON RIFLE has won a large majority of all the prizes at the National Creedmoor Range, and the highest score ever made at any match, in this country or in Europe, was made with a REMINGTON RIFLE, at Creedmoor, September 26th, 1874.

THE INTERNATIONAL RIFLE MATCH.

The very perfect and excellent Target Diagrams of the result of the great International Rifle Match at Creedmoor on the memorable 26th of September, is reproduced from the HERALD to the HERALD ALMANAC. Thus we supply a desideratum that will be prized beyond measure, not only when the crack shots resume their contest next year on Irish soil, but from year to year, as the interest in these international matches will increase, and reference to the first contest be indispensable to all future ones.

Description of the Targets.

Much depends upon the targets and their proper adjustment. The targets at Creedmoor are in every way as perfect as the most recent improvements in their manufacture can make them. All are of heavy boiler iron, and the various positions on them are indicated by white and black paint. They are all placed on a line, and in front of them is a deep trench in which the markers are stationed. They are protected from all danger by a heavy mound of earth in front and a flange of sheet iron at the bottom of the target. There are three sizes of targets in use at Creedmoor. They are for use at various distances. The distances at which all matches are shot are 200, 400, 500, 600, 800, 900 and 1,000 yards. Up to 300 yards the target is six feet in height by four feet in width, the bull's eye eight inches square and the centre two feet square. When the range is from 300 to 600 yards the target used is exactly six feet square, the bull's eye is two feet square and the centre four feet square. When the range is over 600 and up to 1,000 yards, the target used is six feet high by twelve wide, the bull's eye is three feet square and the centre six feet square. No provision is made for outers on top or bottom of this target. The accompanying cut gives an exact representation of the 1,000 yards target. The bull's eye was painted black and hitting it counted four on the score. Hence, to tell the highest possible score it was only necessary to multiply the number of shots by four. The centre was white and was separated from the outer by heavy black lines, which were distinguishable even at the distance of 1,000 yards. A hit in the centre counted three in the score. The outer included three feet on either end of the target, was also white, and a hit within its limits counted two in the score. A bull's eye shot was signaled by a white disk placed over the black part of the target, a centre shot by a red disk, and an outer shot by a black disk. Thus every shot could be read and the score kept by every person on the field.

Mason & Hamlin Organ Co.,

WINNERS OF

THREE HIGHEST MEDALS AND DIPLOMA OF HONOR

AT

VIENNA, 1873,

PARIS, 1867,

OFFER THE FINEST ASSORTMENT OF

THE BEST CABINET ORGANS IN THE WORLD.

Embracing Improvements found in no others; Excelling in Delicacy, Power, and Variety of Beautiful Effects, and Especially in Durability.

The public are cautioned that it is the custom of organ-makers to print in their catalogues enormous prices sometimes two or three times the value of their organs, and are reminded that it is for the interest of dealers to recommend those organs on which largest discounts or commissions are paid them. Largest discounts can be afforded on poorest organs, of which these high prices are printed in manufacturers' catalogues.

The Mason & Hamlin Company STAND ALONE in printing in their catalogues *their very lowest prices*, from which only smallest commissions can be allowed dealers. For this reason, many dealers find the temptation irresistible to recommend other organs as equal, or even superior.

NEW SCHEME OF EASY PAYMENTS.

Having erected new factories, and desiring to greatly increase their business, the Mason & Hamlin Company now offer their celebrated Cabinet Organs, not only exclusively for cash, as formerly, but will also *rent them with privilege of purchase*, or sell *for payments running through one to four years*, at the lowest prices and best terms ever offered for instruments of such thorough excellence.

The following table shows amounts and times of payment on several plans, running through one year, for a FIVE OCTAVE DOUBLE REED ORGAN, in ELEGANT UPRIGHT RESONANT CASE, with VOX HUMANA, AUTOMATIC SWELL, and other Mason & Hamlin improvements.

Style T—Cash Price, $130. Rent per Quarter, $14.30.

PLAN.	Payment in Advance.	In Three Months.	In Six Months.	In Nine Months.	In Twelve Months.	Whole Cost to Purchaser.

APPLETONS' JOURNAL,

A MAGAZINE OF POPULAR LITERATURE.

New and interesting features will be added to APPLETONS' JOURNAL during the ensuing year, and strenuous efforts will be made to give the American public a periodical of a high, and at the same time, popular class—combining instructive material with picturesque statement, superior fiction, with critical and descriptive essays.

A New Novel, by Rhoda Broughton,

Author of "RED AS A ROSE IS SHE," "GOOD-BYE, SWEETHEART!" etc., will be begun in an early number.

Southern By-ways (Illustrated), by Christian Reid,

Will be a feature of the ensuing volume.

Illustrated Papers on the Industrial Arts will afford an interesting and valuable department.

TRAVEL, ADVENTURE, EXPLORATION, NATURAL HISTORY, SOCIAL THEMES, THE ARTS, FICTION, LITERARY REVIEWS, CURRENT TOPICS,

Will each have large place in the plan of the JOURNAL.

Published Weekly. Price, 10 Cents per Number; $4.00 per annum, with postage prepaid.

THE

Popular Science Monthly.

(Established May, 1872.)

CONDUCTED BY PROF. E. L. YOUMANS.

THE POPULAR SCIENCE MONTHLY was started to promote the diffusion of valuable scientific knowledge, in a readable and attractive form, among all classes of the community, and has thus far met a want supplied by no other periodical in the United States.

The great feature of the magazine is, that its contents are not what science *was* ten or more years since, but what it *is* to-day, fresh from the study, the laboratory, and the experiment: clothed in the language of the authors, inventors, and scientists themselves, which comprise the leading minds of England, France, Germany, and the United States.

THE POPULAR SCIENCE MONTHLY is published in a large octavo, handsomely printed on clear type, and, when the subject admits, fully illustrated. Each number contains 128 pages.

TERMS: $5 per Annum, postage free, or 50 cents per Number.

Appletons' Journal and The Popular Science Monthly, together, for $8 per annum, postage prepaid by the publishers.

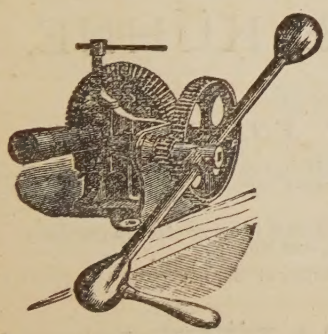
CHASE'S



Pipe Cutting and Threading Machine.

This important tool is designed to fill a want long felt by STEAM AND GAS FITTERS and MACHINISTS, for cutting and threading pipes rapidly and cheaply. An apprentice boy, with one of these, can do more work than two men with old appliances, under the old system. NO PIPE SPLITTING! NO BEVEL INSIDE OR OUT! It cuts threads and makes nipple for all sizes of pipes from 1-8 to 2 inches. Weighs only 100 lbs. Stronger than any machine made. A set of collars and lengths for making nipples goes with the machine. Address

THE CHASE MANUFACTURING COMPANY,
Send for circular. **120 Front St., New York.**
For Sale by Morris, Tasker & Co., Philadelphia, Boston, and New York.

THE
New York Weekly Herald.

JAMES GORDON BENNETT, Editor & Proprietor.

BROADWAY & ANN STREET.

THE WEEKLY HERALD is published every Saturday, at five cents per copy. Annual subscription price:—

One Copy	$2
Three Copies	5
Five Copies	8
Ten Copies	15

Sent free of postage.

Any larger number, addressed to names of subscribers, $1.50 each.

An extra copy will be sent to every club of ten.

Twenty copies, to one address, one year, $25, and any larger number at the same price.

One extra copy will be sent to clubs of twenty.

These rates make the WEEKLY HERALD the cheapest publication in the country.

Terms cash in advance. Money sent by mail will be at the risk of the sender.

A generous portion of the WEEKLY HERALD will be appropriated to Agriculture, Horticulture, Floriculture, Pomology and the management of domestic animals. Particular attention will be paid also to Reports of the Markets.

The aim will be to make the WEEKLY HERALD superior to any other agricultural and family newspaper in the country.

Every number of the WEEKLY HERALD will contain a select story and the latest and most important news by telegraph from all parts of the world up to the hour of publication.

During the session of Congress the WEEKLY HERALD will contain a summary of the proceedings, and the latest News by telegraph from Washington; Political, Religious, Fashionable, Artistic, Literary, and Sporting Intelligence; Obituary Notices, Varieties, Amusements, Editorial Articles on the prominent topics of the day, a review of the Cattle and Dry Goods Markets, Financial and Commercial Intelligence, and accounts of all the important and interesting events of the week.

The HERALD employs no agents in the country nor in distant cities to canvass for subscribers, as none are necessary. Any person pretending to be an agent for the WEEKLY HERALD should be treated as a common swindler. The club system has abolished the agency system. It is safe and cheap.

The price of subscription, whenever practicable, should be transmitted by Post-Office Orders. It is the safest mode of transmitting money by mail.

At small Post-Offices in the country where Post-Office Orders cannot be obtained, money may be remitted in Registered Letters.

Advertisements, to a limited number, will be inserted in the WEEKLY HERALD.

Price of the DAILY HERALD, four cents a copy. Annual subscription price, $12, always in advance.

Write the address on letters to the NEW YORK HERALD, in a bold and legible hand; and give the name of each subscriber, of Post-Office, County, and State, so plainly that no errors in mailing papers will be liable to occur.
